THE FUND

The Lacerte Guardian Fund is a diversified series of Northern Lights Fund Trust, a Delaware statutory trust organized on January 19, 2005 (the "Trust"). The Trust is registered as an open-end management investment company. The Trust is governed by its Board of Trustees (the "Board" or "Trustees").

The Fund may issue an unlimited number of shares of beneficial interest. All shares of the Fund have equal rights and privileges. Each share of the Fund is entitled to one vote on all matters as to which shares are entitled to vote. In addition, each share of the Fund is entitled to participate equally with other shares (i) in dividends and distributions declared by the Fund and (ii) on liquidation, to its proportionate share of the assets remaining after satisfaction of outstanding liabilities. Shares of the Fund are fully paid, non-assessable and fully transferable when issued and have no pre-emptive, conversion or exchange rights. Fractional shares have proportionately the same rights, including voting rights, as are provided for a full share.

The Fund offers two classes of shares: Class I and Class R shares. However, Class R shares are not available for purchase as of the date of this SAI. Each share class represents an interest in the same assets of the Fund, has the same rights and is identical in all material respects except that (i) each class of shares may be subject to different investment minimums, (ii) each class of shares may bear different distribution fees; (iii) certain other class specific expenses will be borne solely by the class to which such expenses are attributable, including transfer agent fees attributable to a specific class of shares, printing and postage expenses related to preparing and distributing materials to current shareholders of a specific class, registration fees incurred by a specific class of shares, the expenses of administrative personnel and services required to support the shareholders of a specific class, litigation or other legal expenses relating to a class of shares, Trustees' fees or expenses incurred as a result of issues relating to a specific class of shares and accounting fees and expenses relating to a specific class of shares and (iv) each class has exclusive voting rights with respect to matters relating to its own distribution arrangements. The Board of Trustees may classify and reclassify the shares of the Fund into additional classes of shares at a future date.

Lacerte Capital Advisers, LLC (the "Adviser") is the Fund's investment adviser. The Fund's investment objective, restrictions and policies are more fully described here and in the Prospectus. The Board may start other series and offer shares of a new fund under the Trust at any time. The Board of Trustees may classify and reclassify the shares of the Fund into additional classes at a future date.

Under the Trust's Agreement and Declaration of Trust, each Trustee will continue in office until the termination of the Trust or his/her earlier death, incapacity, resignation or removal. Shareholders can remove a Trustee to the extent provided by the Investment Company Act of 1940, as amended (the "1940 Act") and the rules and regulations promulgated thereunder. Vacancies may be filled by a majority of the

remaining Trustees, except insofar as the 1940 Act may require the election by shareholders. As a result, normally no annual or regular meetings of shareholders will be held unless matters arise requiring a vote of shareholders under the Agreement and Declaration of Trust or the 1940 Act.

TYPES OF INVESTMENTS

The investment objective of the Fund and a description of its principal investment strategies are set forth under “Fund Summary” in the Prospectus. The Fund’s investment objective is not “fundamental” and may be changed without the approval of a majority of its outstanding voting securities, however, shareholders will be given at least 60 days notice of such a change.

The following information describes securities in which the Fund may invest and their related risks.

EQUITY SECURITIES

Equity securities include common stock, preferred stock and securities convertible into common stocks, such as convertible bonds, warrants, rights and options. The value of equity securities varies in response to many factors, including the activities and financial condition of individual companies, the business market in which individual companies compete and general market and economic conditions. Equity securities fluctuate in value, often based on factors unrelated to the value of the issuer of the securities, and such fluctuations can be significant.

Common Stock

Common stock represents an equity (ownership) interest in a company, and usually possesses voting rights and earns dividends. Dividends on common stock are not fixed but are declared at the discretion of the issuer. Common stock generally represents the riskiest investment in a company. In addition, common stock generally has the greatest appreciation and depreciation potential because increases and decreases in earnings are usually reflected in a company's stock price.

The fundamental risk of investing in common and preferred stock is the risk that the value of the stock might decrease. Stock values fluctuate in response to the activities of an individual company or in response to general market and/or economic conditions. Historically, common stocks have provided greater long-term returns and have entailed greater short-term risks than preferred stocks, fixed-income securities and money market investments. The market value of all securities, including common and preferred stocks, is based upon the market's perception of value and not necessarily the book value of an issuer or other objective measures of a company's worth.

Convertible Securities

The Fund may invest in convertible securities and non-investment grade convertible securities. Convertible securities include fixed income securities that may be exchanged or converted into a predetermined number of shares of the issuer's underlying common stock at the option of the holder during a specified period. Convertible securities may take the form of convertible preferred stock, convertible bonds or debentures, units consisting of "usable" bonds and warrants or a combination of the features of several of these securities. Convertible securities are senior to common stocks in an issuer's capital structure, but are usually subordinated to similar non-convertible securities. While providing a fixed-income stream (generally higher in yield than the income derivable from common stock but lower than that afforded by a similar nonconvertible security), a convertible security also gives an investor the opportunity, through its conversion feature, to participate in the capital appreciation of the issuing company depending upon a market price advance in the convertible security's underlying common stock.

Preferred Stock

Preferred stocks are securities that have characteristics of both common stocks and corporate bonds. Preferred stocks may receive dividends but payment is not guaranteed as with a bond. These securities may be undervalued because of a lack of analyst coverage resulting in a high dividend yield or yield to maturity. The risks of preferred stocks include a lack of voting rights and the Fund's adviser may incorrectly analyze the security, resulting in a loss to the Fund. Furthermore, preferred stock dividends are not guaranteed and management can elect to forego the preferred dividend, resulting in a loss to the Fund. Preferred stock may also be convertible in the common stock of the issuer. Convertible securities may be exchanged or converted into a predetermined number of shares of the issuer's underlying common stock at the option of the holder during a specified period. Convertible securities are senior to common stocks in an issuer's capital structure, but are usually subordinated to similar non-convertible securities. A convertible security also gives an investor the opportunity, through its conversion feature, to participate in the capital appreciation of the issuing company depending upon a market price advance in the convertible security's underlying common stock. In general, preferred stocks generally pay a dividend at a specified rate and have preference over common stock in the payment of dividends and in liquidation. The Fund may invest in preferred stock with any or no credit rating. Preferred stock is a class of stock having a preference over common stock as to the payment of dividends and the recovery of investment should a company be liquidated, although preferred stock is usually junior to the debt securities of the issuer. Preferred stock market value may change based on changes in interest rates.

Warrants

The Fund may invest in warrants. Warrants are options to purchase common stock at a specific price (usually at a premium above the market value of the optioned common stock at issuance) valid for a specific period of time. Warrants may have a life

ranging from less than one year to twenty years, or they may be perpetual. However, most warrants have expiration dates after which they are worthless. In addition, a warrant is worthless if the market price of the common stock does not exceed the warrant's exercise price during the life of the warrant. Warrants have no voting rights, pay no dividends, and have no rights with respect to the assets of the corporation issuing them. The percentage increase or decrease in the market price of the warrant may tend to be greater than the percentage increase or decrease in the market price of the optioned common stock.

Investment Companies

The Fund may invest in investment companies such as open-end funds (mutual funds), closed-end funds, and exchange traded funds (also referred to as "Underlying Funds"). The 1940 Act provides that the mutual funds may not: (1) purchase more than 3% of an investment company's outstanding shares; (2) invest more than 5% of its assets in any single such investment company (the "5% Limit"), and (3) invest more than 10% of its assets in investment companies overall (the "10% Limit"), unless: (i) the underlying investment company and/or the Fund has received an order for exemptive relief from such limitations from the Securities and Exchange Commission ("SEC"); and (ii) the underlying investment company and the Fund take appropriate steps to comply with any conditions in such order.

In addition, Section 12(d)(1)(F) of the Investment Company Act of 1940, as amended provides that the provisions of paragraph 12(d)(1) shall not apply to securities purchased or otherwise acquired by the Fund if (i) immediately after such purchase or acquisition not more than 3% of the total outstanding stock of such registered investment company is owned by the Fund and all affiliated persons of the Fund; and (ii) the Fund has not, and is not proposing to offer or sell any security issued by it through a principal underwriter or otherwise at a public or offering price which includes a sales load of more than 1 ½% percent. An investment company that issues shares to the Fund pursuant to paragraph 12(d)(1)(F) shall not be required to redeem its shares in an amount exceeding 1% of such investment company's total outstanding shares in any period of less than thirty days. The Fund (or the Adviser acting on behalf of the Fund) must comply with the following voting restrictions: when the Fund exercises voting rights, by proxy or otherwise, with respect to investment companies owned by the Fund, the Fund will either seek instruction from the Fund's shareholders with regard to the voting of all proxies and vote in accordance with such instructions, or vote the shares held by the Fund in the same proportion as the vote of all other holders of such security.

Further, the Fund may rely on Rule 12d1-3, which allows unaffiliated mutual funds to exceed the 5% Limitation and the 10% Limitation, provided the aggregate sales loads any investor pays (i.e., the combined distribution expenses of both the acquiring fund and the acquired funds) does not exceed the limits on sales loads established by the Financial Industry Regulatory Authority, Inc. ("FINRA") for funds of funds.

The Fund and any "affiliated persons," as defined by the 1940 Act, may purchase in the aggregate only up to 3% of the total outstanding securities of any Underlying

Fund. Accordingly, when affiliated persons hold shares of any of the Underlying Funds, the Fund's ability to invest fully in shares of those funds is restricted, and the Adviser must then, in some instances, select alternative investments that would not have been its first preference. The 1940 Act also provides that an Underlying Fund whose shares are purchased by the Fund will be obligated to redeem shares held by the Fund only in an amount up to 1% of the Underlying Fund's outstanding securities during any period of less than 30 days. Shares held by the Fund in excess of 1% of an Underlying Fund's outstanding securities therefore, will be considered not readily marketable securities, which, together with other such securities, may not exceed 15% of the Fund's total assets.

Under certain circumstances an Underlying Fund may determine to make payment of a redemption by the Fund wholly or partly by a distribution in kind of securities from its portfolio, in lieu of cash, in conformity with the rules of the SEC. In such cases, the Fund may hold securities distributed by an Underlying Fund until the Adviser determines that it is appropriate to dispose of such securities.

Investment decisions by the investment advisors of the Underlying Funds are made independently of the Fund and its Adviser. Therefore, the investment advisor of one Underlying Fund may be purchasing shares of the same issuer whose shares are being sold by the investment advisor of another such fund. The result would be an indirect expense to the Fund without accomplishing any investment purpose. Because other investment companies employ an investment adviser, such investments by the Fund may cause shareholders to bear duplicate fees.

Closed-End Investment Companies. The Fund may invest its assets in "closed-end" investment companies (or "closed-end funds"), subject to the investment restrictions set forth above. Shares of closed-end funds are typically offered to the public in a one-time initial public offering by a group of underwriters who retain a spread or underwriting commission of between 4% or 6% of the initial public offering price. Such securities are then listed for trading on the New York Stock Exchange, the American Stock Exchange, the National Association of Securities Dealers Automated Quotation System (commonly known as "NASDAQ") and, in some cases, may be traded in other over-the-counter markets. Because the shares of closed-end funds cannot be redeemed upon demand to the issuer like the shares of an open-end investment company (such as the Fund), investors seek to buy and sell shares of closed-end funds in the secondary market.

The Fund generally will purchase shares of closed-end funds only in the secondary market. The Fund will incur normal brokerage costs on such purchases similar to the expenses the Fund would incur for the purchase of securities of any other type of issuer in the secondary market. The Fund may, however, also purchase securities of a closed-end fund in an initial public offering when, in the opinion of the Adviser, based on a consideration of the nature of the closed-end fund's proposed investments, the prevailing market conditions and the level of demand for such securities, they represent an attractive opportunity for growth of capital. The initial offering price typically will include a dealer spread, which may be higher than the

applicable brokerage cost if the Fund purchased such securities in the secondary market.

The shares of many closed-end funds, after their initial public offering, frequently trade at a price per share that is less than the net asset value per share, the difference representing the "market discount" of such shares. This market discount may be due in part to the investment objective of long-term appreciation, which is sought by many closed-end funds, as well as to the fact that the shares of closed-end funds are not redeemable by the holder upon demand to the issuer at the next determined net asset value but rather are subject to the principles of supply and demand in the secondary market. A relative lack of secondary market purchasers of closed-end fund shares also may contribute to such shares trading at a discount to their net asset value.

The Fund may invest in shares of closed-end funds that are trading at a discount to net asset value or at a premium to net asset value. There can be no assurance that the market discount on shares of any closed-end fund purchased by the Fund will ever decrease. In fact, it is possible that this market discount may increase and the Fund may suffer realized or unrealized capital losses due to further decline in the market price of the securities of such closed-end funds, thereby adversely affecting the net asset value of the Fund's shares. Similarly, there can be no assurance that any shares of a closed-end fund purchased by the Fund at a premium will continue to trade at a premium or that the premium will not decrease subsequent to a purchase of such shares by the Fund.

Closed-end funds may issue senior securities (including preferred stock and debt obligations) for the purpose of leveraging the closed-end fund's common shares in an attempt to enhance the current return to such closed-end fund's common shareholders. The Fund's investment in the common shares of closed-end funds that are financially leveraged may create an opportunity for greater total return on its investment, but at the same time may be expected to exhibit more volatility in market price and net asset value than an investment in shares of investment companies without a leveraged capital structure.

Exchange Traded Funds. ETFs are typically passive funds that track their related index and have the flexibility of trading like a security. They are managed by professionals and provide the investor with diversification, cost and tax efficiency, liquidity, marginability, are useful for hedging, have the ability to go long and short, and some provide quarterly dividends. Additionally, some ETFs are unit investment trusts (UITs), which are unmanaged portfolios overseen by trustees and some ETFs may be grantor trusts. An ETF typically holds a portfolio of securities or contracts designed to track a particular market segment or index. Some examples of ETFs are Rydex SharesTM, ProShares®, SPDRs®, streetTRACKS, DIAMONDSSM, NASDAQ 100 Index Tracking StockSM ("QQQsSM"), and iShares®. The Fund expects to use ETF's as part of its overall investment strategy and as part of its hedging strategy. To offset the risk of declining security prices, the Fund may invest in inverse ETF's. Inverse ETF's are funds designed to rise in price when stock prices are falling. Additionally, inverse ETF's

may employ leverage which magnifies the changes in the underlying stock index upon which they are based. Inverse ETF index funds seek to provide investment results that will match a certain percentage of the inverse of the performance of a specific benchmark on a daily basis. For example, if an inverse ETF's current benchmark is 200% of the inverse of the Russell 2000 Index and the ETF meets its objective, the value of the ETF will tend to increase on a daily basis when the value of the underlying index decreases (e.g., if the Russell 2000 Index goes down 5% then the inverse ETF's value should go up 10%). ETFs generally have two markets. The primary market is where institutions swap "creation units" in block-multiples of 50,000 shares for in-kind securities and cash in the form of dividends. The secondary market is where individual investors can trade as little as a single share during trading hours on the exchange. This is different from open-ended mutual funds that are traded after hours once the net asset value (NAV) is calculated. ETFs share many similar risks with open-end and closed-end funds.

There is a risk that an ETFs in which the Fund invests may terminate due to extraordinary events that may cause any of the service providers to the ETFs, such as the trustee or sponsor, to close or otherwise fail to perform their obligations to the ETF. Also, because the ETFs in which the Fund intends to principally invest may be granted licenses by agreement to use the indices as a basis for determining their compositions and/or otherwise to use certain trade names, the ETFs may terminate if such license agreements are terminated. In addition, an ETF may terminate if its entire net asset value falls below a certain amount. Although the Fund believes that, in the event of the termination of an underlying ETF, it will be able to invest instead in shares of an alternate ETF tracking the same market index or another market index with the same general market, there is no guarantee that shares of an alternate ETF would be available for investment at that time. To the extent the Fund invests in a sector product, the Fund is subject to the risks associated with that sector.

The Fund could also purchase an ETF to temporarily gain exposure to a portion of the U.S. or foreign market while awaiting an opportunity to purchase securities directly. The risks of owning an ETF generally reflect the risks of owning the underlying securities they are designed to track, although lack of liquidity in an ETF could result in it being more volatile than the underlying portfolio of securities and ETFs have management fees that increase their costs versus the costs of owning the underlying securities directly.

ETFs are listed on national stock exchanges and are traded like stocks listed on an exchange. ETF shares may trade at a discount or a premium in market price if there is a limited market in such shares. Investments in ETFs are subject to brokerage and other trading costs, which could result in greater expenses to the Fund. ETFs also are subject to investment advisory and other expenses, which will be indirectly paid by the Fund. As a result, your cost of investing in the Fund will be higher than the cost of investing directly in ETFs and may be higher than other mutual funds that invest exclusively in stocks and bonds. You will indirectly bear fees and expenses charged by the ETFs in addition to the Fund's direct fees and expenses. Finally, because the value

of ETF shares depends on the demand in the market, the Adviser may not be able to liquidate the Fund's holdings at the most optimal time, adversely affecting the Fund's performance.

ETF's may also include high beta index funds ("HBIFs"), which track an index by investing in leveraged instruments such as equity index swaps, futures contracts and options on securities, futures contracts, and stock indices. HBIFs are more volatile than the benchmark index they track and typically don't invest directly in the securities included in the benchmark, or in the same proportion that those securities are represented in that benchmark. On a day-to-day basis, HBIFs will target a volatility that is a specific percentage of the volatility of the underlying index. HBIFs seek to provide investment results that will match a certain percentage greater than 100% of the performance of a specific benchmark on a daily basis. For example, if a HBIF's current benchmark is 200% of the S&P 500 Index and it meets its objective, the value of the HBIF will tend to increase on a daily basis 200% of any increase in the underlying index (if the S&P 500 Index goes up 5% then the HBIF's value should go up 10%). When the value of the underlying index declines, the value of the HBIF's shares should also decrease on a daily basis by 200% of the value of any decrease in the underlying index (if the S&P 500 Index goes down 5% then the value of the HBIF should go down 10%).

DERIVATIVES

Futures Contracts

A futures contract provides for the future sale by one party and purchase by another party of a specified amount of a specific financial instrument (e.g., units of a stock index) for a specified price, date, time and place designated at the time the contract is made. Brokerage fees are incurred when a futures contract is bought or sold and margin deposits must be maintained. Entering into a contract to buy is commonly referred to as buying or purchasing a contract or holding a long position. Entering into a contract to sell is commonly referred to as selling a contract or holding a short position.

Unlike when the Fund purchases or sells a security, no price would be paid or received by the Fund upon the purchase or sale of a futures contract. Upon entering into a futures contract, and to maintain the Fund's open positions in futures contracts, the Fund would be required to deposit with its custodian or futures broker in a segregated account in the name of the futures broker an amount of cash, U.S. government securities, suitable money market instruments, or other liquid securities, known as "initial margin." The margin required for a particular futures contract is set by the exchange on which the contract is traded, and may be significantly modified from time to time by the exchange during the term of the contract. Futures contracts are customarily purchased and sold on margins that may range upward from less than 5% of the value of the contract being traded.

If the price of an open futures contract changes (by increase in underlying instrument or index in the case of a sale or by decrease in the case of a purchase) so

that the loss on the futures contract reaches a point at which the margin on deposit does not satisfy margin requirements, the broker will require an increase in the margin. However, if the value of a position increases because of favorable price changes in the futures contract so that the margin deposit exceeds the required margin, the broker will pay the excess to the Fund.

These subsequent payments, called "variation margin," to and from the futures broker, are made on a daily basis as the price of the underlying assets fluctuate making the long and short positions in the futures contract more or less valuable, a process known as "marking to the market." The Fund expects to earn interest income on its margin deposits.

Although certain futures contracts, by their terms, require actual future delivery of and payment for the underlying instruments, in practice most futures contracts are usually closed out before the delivery date. Closing out an open futures contract purchase or sale is effected by entering into an offsetting futures contract sale or purchase, respectively, for the same aggregate amount of the identical underlying instrument or index and the same delivery date. If the offsetting purchase price is less than the original sale price, the Fund realizes a gain; if it is more, the Fund realizes a loss. Conversely, if the offsetting sale price is more than the original purchase price, the Fund realizes a gain; if it is less, the Fund realizes a loss. The transaction costs must also be included in these calculations. There can be no assurance, however, that the Fund will be able to enter into an offsetting transaction with respect to a particular futures contract at a particular time. If the Fund is not able to enter into an offsetting transaction, the Fund will continue to be required to maintain the margin deposits on the futures contract.

For example, one contract in the Financial Times Stock Exchange 100 Index future is a contract to buy 25 pounds sterling multiplied by the level of the UK Financial Times 100 Share Index on a given future date. Settlement of a stock index futures contract may or may not be in the underlying instrument or index. If not in the underlying instrument or index, then settlement will be made in cash, equivalent over time to the difference between the contract price and the actual price of the underlying asset at the time the stock index futures contract expires.

Options on Futures Contracts

The Fund may purchase and sell options on the same types of futures in which it may invest. Options on futures are similar to options on underlying instruments except that options on futures give the purchaser the right, in return for the premium paid, to assume a position in a futures contract (a long position if the option is a call and a short position if the option is a put), rather than to purchase or sell the futures contract, at a specified exercise price at any time during the period of the option. Upon exercise of the option, the delivery of the futures position by the writer of the option to the holder of the option will be accompanied by the delivery of the accumulated balance in the writer's futures margin account which represents the amount by which the market price of the

futures contract, at exercise, exceeds (in the case of a call) or is less than (in the case of a put) the exercise price of the option on the futures contract. Purchasers of options who fail to exercise their options prior to the exercise date suffer a loss of the premium paid.

Regulation as a Commodity Pool Operator

The Trust, on behalf of the Fund, has filed with the National Futures Association, a notice claiming an exclusion from the definition of the term "commodity pool operator" under the Commodity Exchange Act, as amended, and the rules of the Commodity Futures Trading Commission ("CFTC") promulgated thereunder, with respect to the Fund's operations. Accordingly, the Fund is not subject to registration or regulation as a commodity pool operator.

Options on Securities

The Fund may purchase and write (*i.e.*, sell) put and call options. Such options may relate to particular securities or stock indices, and may or may not be listed on a domestic or foreign securities exchange and may or may not be issued by the Options Clearing Corporation. Options trading is a highly specialized activity that entails greater than ordinary investment risk. Options may be more volatile than the underlying instruments, and therefore, on a percentage basis, an investment in options may be subject to greater fluctuation than an investment in the underlying instruments themselves.

A call option for a particular security gives the purchaser of the option the right to buy, and the writer (seller) the obligation to sell, the underlying security at the stated exercise price at any time prior to the expiration of the option, regardless of the market price of the security. The premium paid to the writer is in consideration for undertaking the obligation under the option contract. A put option for a particular security gives the purchaser the right to sell the security at the stated exercise price at any time prior to the expiration date of the option, regardless of the market price of the security.

Stock index options are put options and call options on various stock indices. In most respects, they are identical to listed options on common stocks. The primary difference between stock options and index options occurs when index options are exercised. In the case of stock options, the underlying security, common stock, is delivered. However, upon the exercise of an index option, settlement does not occur by delivery of the securities comprising the index. The option holder who exercises the index option receives an amount of cash if the closing level of the stock index upon which the option is based is greater than, in the case of a call, or less than, in the case of a put, the exercise price of the option. This amount of cash is equal to the difference between the closing price of the stock index and the exercise price of the option expressed in dollars times a specified multiple. A stock index fluctuates with changes in the market value of the stocks included in the index. For example, some stock index options are based on a broad market index, such as the Standard & Poor's 500® Index or the Value Line Composite Index or a narrower market index, such as the Standard &

Poor's 100®. Indices may also be based on an industry or market segment, such as the AMEX Oil and Gas Index or the Computer and Business Equipment Index. Options on stock indices are currently traded on the Chicago Board Options Exchange, the New York Stock Exchange, the American Stock Exchange, the Pacific Stock Exchange and the Philadelphia Stock Exchange.

The Fund's obligation to sell an instrument subject to a call option written by it, or to purchase an instrument subject to a put option written by it, may be terminated prior to the expiration date of the option by the Fund's execution of a closing purchase transaction, which is effected by purchasing on an exchange an option of the same series (*i.e.*, same underlying instrument, exercise price and expiration date) as the option previously written. A closing purchase transaction will ordinarily be effected to realize a profit on an outstanding option, to prevent an underlying instrument from being called, to permit the sale of the underlying instrument or to permit the writing of a new option containing different terms on such underlying instrument. The cost of such a liquidation purchase plus transactions costs may be greater than the premium received upon the original option, in which event the Fund will have incurred a loss in the transaction. There is no assurance that a liquid secondary market will exist for any particular option. An option writer unable to effect a closing purchase transaction will not be able to sell the underlying instrument or liquidate the assets held in a segregated account, as described below, until the option expires or the optioned instrument is delivered upon exercise. In such circumstances, the writer will be subject to the risk of market decline or appreciation in the instrument during such period.

If an option purchased by the Fund expires unexercised, the Fund realizes a loss equal to the premium paid. If the Fund enters into a closing sale transaction on an option purchased by it, the Fund will realize a gain if the premium received by the Fund on the closing transaction is more than the premium paid to purchase the option or a loss if it is less. If an option written by the Fund expires on the stipulated expiration date or if the Fund enters into a closing purchase transaction, it will realize a gain (or loss if the cost of a closing purchase transaction exceeds the net premium received when the option is sold). If an option written by the Fund is exercised, the proceeds of the sale will be increased by the net premium originally received and the Fund will realize a gain or loss.

Certain Risks Regarding Options. There are several risks associated with transactions in options. For example, there are significant differences between the securities and options markets that could result in an imperfect correlation between these markets, causing a given transaction not to achieve its objectives. In addition, a liquid secondary market for particular options, whether traded over-the-counter or on an exchange, may be absent for reasons which include the following: there may be insufficient trading interest in certain options; restrictions may be imposed by an exchange on opening transactions or closing transactions or both; trading halts, suspensions or other restrictions may be imposed with respect to particular classes or series of options or underlying securities or currencies; unusual or unforeseen circumstances may interrupt normal operations on an exchange; the facilities of an exchange or the Options Clearing Corporation may not at all times be adequate to

handle current trading value; or one or more exchanges could, for economic or other reasons, decide or be compelled at some future date to discontinue the trading of options (or a particular class or series of options), in which event the secondary market on that exchange (or in that class or series of options) would cease to exist, although outstanding options that had been issued by the Options Clearing Corporation as a result of trades on that exchange would continue to be exercisable in accordance with their terms.

Successful use by the Fund of options on stock indices will be subject to the ability of the advisor to correctly predict movements in the directions of the stock market. This requires different skills and techniques than predicting changes in the prices of individual securities. In addition, the Fund's ability to effectively hedge all or a portion of the securities in its portfolio, in anticipation of or during a market decline, through transactions in put options on stock indices, depends on the degree to which price movements in the underlying index correlate with the price movements of the securities held by the Fund. Inasmuch as the Fund's securities will not duplicate the components of an index, the correlation will not be perfect. Consequently, the Fund bears the risk that the prices of its securities being hedged will not move in the same amount as the prices of its put options on the stock indices. It is also possible that there may be a negative correlation between the index and the Fund's securities that would result in a loss on both such securities and the options on stock indices acquired by the Fund.

The hours of trading for options may not conform to the hours during which the underlying securities are traded. To the extent that the options markets close before the markets for the underlying securities, significant price and rate movements can take place in the underlying markets that cannot be reflected in the options markets. The purchase of options is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. The purchase of stock index options involves the risk that the premium and transaction costs paid by the Fund in purchasing an option will be lost as a result of unanticipated movements in prices of the securities comprising the stock index on which the option is based.

There is no assurance that a liquid secondary market on an options exchange will exist for any particular option, or at any particular time, and for some options no secondary market on an exchange or elsewhere may exist. If the Fund is unable to close out a call option on securities that it has written before the option is exercised, the Fund may be required to purchase the optioned securities in order to satisfy its obligation under the option to deliver such securities. If the Fund was unable to effect a closing sale transaction with respect to options on securities that it has purchased, it would have to exercise the option in order to realize any profit and would incur transaction costs upon the purchase and sale of the underlying securities.

Cover for Options Positions. Transactions using options (other than options that the Fund has purchased) expose the Fund to an obligation to another party. The Fund will not enter into any such transactions unless it owns either (i) an offsetting ("covered")

position in securities or other options or (ii) cash or liquid securities with a value sufficient at all times to cover its potential obligations not covered as provided in (i) above. The Fund will comply with SEC guidelines regarding cover for these instruments and, if the guidelines so require, set aside cash or liquid securities in a segregated account with the Custodian in the prescribed amount. Under current SEC guidelines, the Fund will segregate assets to cover transactions in which the Fund writes or sells options.

Assets used as cover or held in a segregated account cannot be sold while the position in the corresponding option is open, unless they are replaced with similar assets. As a result, the commitment of a large portion of the Fund's assets to cover or segregated accounts could impede portfolio management or the Fund's ability to meet redemption requests or other current obligations.

Dealer Options

The Fund may engage in transactions involving dealer options as well as exchange-traded options. Certain additional risks are specific to dealer options. While the Fund might look to a clearing corporation to exercise exchange-traded options, if the Fund were to purchase a dealer option it would need to rely on the dealer from which it purchased the option to perform if the option were exercised. Failure by the dealer to do so would result in the loss of the premium paid by the Fund as well as loss of the expected benefit of the transaction.

Exchange-traded options generally have a continuous liquid market while dealer options may not. Consequently, the Fund may generally be able to realize the value of a dealer option it has purchased only by exercising or reselling the option to the dealer who issued it. Similarly, when the Fund writes a dealer option, the Fund may generally be able to close out the option prior to its expiration only by entering into a closing purchase transaction with the dealer to whom the Fund originally wrote the option. While the Fund will seek to enter into dealer options only with dealers who will agree to and which are expected to be capable of entering into closing transactions with the Fund, there can be no assurance that the Fund will at any time be able to liquidate a dealer option at a favorable price at any time prior to expiration. Unless the Fund, as a covered dealer call option writer, is able to effect a closing purchase transaction, it will not be able to liquidate securities (or other assets) used as cover until the option expires or is exercised. In the event of insolvency of the other party, the Fund may be unable to liquidate a dealer option. With respect to options written by the Fund, the inability to enter into a closing transaction may result in material losses to the Fund. For example, because the Fund must maintain a secured position with respect to any call option on a security it writes, the Fund may not sell the assets that it has segregated to secure the position while it is obligated under the option. This requirement may impair the Fund's ability to sell portfolio securities at a time when such sale might be advantageous.

The Staff of the SEC has taken the position that purchased dealer options are illiquid securities. The Fund may treat the cover used for written dealer options as liquid if the dealer agrees that the Fund may repurchase the dealer option it has written for a

maximum price to be calculated by a predetermined formula. In such cases, the dealer option would be considered illiquid only to the extent the maximum purchase price under the formula exceeds the intrinsic value of the option. Accordingly, the Fund will treat dealer options as subject to the Fund's limitation on illiquid securities. If the SEC changes its position on the liquidity of dealer options, the Fund will change its treatment of such instruments accordingly.

Spread Transactions

The Fund may purchase covered spread options from securities dealers. These covered spread options are not presently exchange-listed or exchange-traded. The purchase of a spread option gives the Fund the right to put securities that it owns at a fixed dollar spread or fixed yield spread in relationship to another security that the Fund does not own, but which is used as a benchmark. The risk to the Fund, in addition to the risks of dealer options described above, is the cost of the premium paid as well as any transaction costs. The purchase of spread options will be used to protect the Fund against adverse changes in prevailing credit quality spreads, *i.e.*, the yield spread between high quality and lower quality securities. This protection is provided only during the life of the spread options.

Swap Agreements

The Fund may enter into interest rate, index and currency exchange rate swap agreements in an attempt to obtain a particular desired return at a lower cost to the Fund than if it had invested directly in an instrument that yielded that desired return. Swap agreements are two-party contracts entered into primarily by institutional investors for periods ranging from a few weeks to more than one year. In a standard "swap" transaction, two parties agree to exchange the returns (or differentials in rates of returns) earned or realized on particular predetermined investments or instruments. The gross returns to be exchanged or "swapped" between the parties are calculated with respect to a "notional amount," *i.e.*, the return on or increase in value of a particular dollar amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. The "notional amount" of the swap agreement is only a fictive basis on which to calculate the obligations the parties to a swap agreement have agreed to exchange. The Fund's obligations (or rights) under a swap agreement will generally be equal only to the amount to be paid or received under the agreement based on the relative values of the positions held by each party to the agreement (the "net amount"). The Fund's obligations under a swap agreement will be accrued daily (offset against any amounts owing to the Fund) and any accrued but unpaid net amounts owed to a swap counterparty will be covered by the maintenance of a segregated account consisting of cash, U.S. government securities, or other liquid securities, to avoid leveraging of the Fund's portfolio.

Whether the Fund's use of swap agreements enhance the Fund's total return will depend on the adviser's ability correctly to predict whether certain types of investments are likely to produce greater returns than other investments. Because they are two-party

contracts and may have terms of greater than seven days, swap agreements may be considered to be illiquid. Moreover, the Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty. The Fund's adviser will cause the Fund to enter into swap agreements only with counterparties that would be eligible for consideration as repurchase agreement counterparties under the Fund's repurchase agreement guidelines. The swap market is a relatively new market and is largely unregulated. It is possible that developments in the swaps market, including potential government regulation, could adversely affect the Fund's ability to terminate existing swap agreements or to realize amounts to be received under such agreements.

Certain swap agreements are exempt from most provisions of the Commodity Exchange Act ("CEA") and, therefore, are not regulated as futures or commodity option transactions under the CEA, pursuant to regulations of the CFTC. To qualify for this exemption, a swap agreement must be entered into by "eligible participants," which include the following, provided the participants' total assets exceed established levels: a bank or trust company, savings association or credit union, insurance company, investment company subject to regulation under the 1940 Act, commodity pool, corporation, partnership, proprietorship, organization, trust or other entity, employee benefit plan, governmental entity, broker-dealer, futures commission merchant, natural person, or regulated foreign person. To be eligible, natural persons and most other entities must have total assets exceeding \$10 million; commodity pools and employees benefit plans must have assets exceeding \$5 million. In addition, an eligible swap transaction must meet three conditions. First, the swap agreement may not be part of a fungible class of agreements that are standardized as to their material economic terms. Second, the creditworthiness of parties with actual or potential obligations under the swap agreement must be a material consideration in entering into or determining the terms of the swap agreement, including pricing, cost or credit enhancement terms. Third, swap agreements may not be entered into and traded on or through a multilateral transaction execution facility.

Certain Investment Techniques and Derivatives Risks.

When the adviser of a mutual fund uses investment techniques such as margin, leverage and short sales, and forms of financial derivatives, such as options and futures, an investment in the fund may be more volatile than investments in other mutual funds. Although the intention is to use such investment techniques and derivatives to minimize risk to the Fund, as well as for speculative purposes, there is the possibility that improper implementation of such techniques and derivative strategies or unusual market conditions could result in significant losses to the Fund. Derivatives are used to limit risk in the Fund or to enhance investment return and have a return tied to a formula based upon an interest rate, index, price of a security, or other measurement. Derivatives involve special risks, including: (1) the risk that interest rates, securities prices and currency markets will not move in the direction that a portfolio manager anticipates; (2) imperfect correlation between the price of derivative instruments and movements in the prices of the securities, interest rates or currencies being hedged; (3)

the fact that skills needed to use these strategies are different than those needed to select portfolio securities; (4) the possible absence of a liquid secondary market for any particular instrument and possible exchange imposed price fluctuation limits, either of which may make it difficult or impossible to close out a position when desired; (5) the risk that adverse price movements in an instrument can result in a loss substantially greater than the Fund's initial investment in that instrument (in some cases, the potential loss is unlimited); (6) particularly in the case of privately-negotiated instruments, the risk that the counterparty will not perform its obligations, or that penalties could be incurred for positions held less than the required minimum holding period, which could leave the Fund worse off than if it had not entered into the position; and (7) the inability to close out certain hedged positions to avoid adverse tax consequences. In addition, the use of derivatives for non-hedging purposes (that is, to seek to increase total return) is considered a speculative practice and may present an even greater risk of loss than when used for hedging purposes.

FIXED INCOME/DEBT/BOND SECURITIES

Yields on fixed income securities are dependent on a variety of factors, including the general conditions of the money market and other fixed income securities markets, the size of a particular offering, the maturity of the obligation and the rating of the issue. An investment in the Fund will be subjected to risk even if all fixed income securities in the Fund's portfolio are paid in full at maturity. All fixed income securities, including U.S. Government securities, can change in value when there is a change in interest rates or the issuer's actual or perceived creditworthiness or ability to meet its obligations.

There is normally an inverse relationship between the market value of securities sensitive to prevailing interest rates and actual changes in interest rates. In other words, an increase in interest rates produces a decrease in market value. The longer the remaining maturity (and duration) of a security, the greater will be the effect of interest rate changes on the market value of that security. Changes in the ability of an issuer to make payments of interest and principal and in the markets' perception of an issuer's creditworthiness will also affect the market value of the debt securities of that issuer. Obligations of issuers of fixed income securities (including municipal securities) are subject to the provisions of bankruptcy, insolvency, and other laws affecting the rights and remedies of creditors, such as the Federal Bankruptcy Reform Act of 1978. In addition, the obligations of municipal issuers may become subject to laws enacted in the future by Congress, state legislatures, or referenda extending the time for payment of principal and/or interest, or imposing other constraints upon enforcement of such obligations or upon the ability of municipalities to levy taxes. Changes in the ability of an issuer to make payments of interest and principal and in the market's perception of an issuer's creditworthiness will also affect the market value of the debt securities of that issuer. The possibility exists, therefore, that the ability of any issuer to pay, when due, the principal of and interest on its debt securities may become impaired.

The corporate debt securities in which the Fund may invest include corporate bonds and notes and short-term investments such as commercial paper and variable

rate demand notes. Commercial paper (short-term promissory notes) is issued by companies to finance their or their affiliate's current obligations and is frequently unsecured. Variable and floating rate demand notes are unsecured obligations redeemable upon not more than 30 days' notice. These obligations include master demand notes that permit investment of fluctuating amounts at varying rates of interest pursuant to a direct arrangement with the issuer of the instrument. The issuer of these obligations often has the right, after a given period, to prepay the outstanding principal amount of the obligations upon a specified number of days' notice. These obligations generally are not traded, nor generally is there an established secondary market for these obligations. To the extent a demand note does not have a 7-day or shorter demand feature and there is no readily available market for the obligation, it is treated as an illiquid security.

The Fund may invest in debt securities, including non-investment grade debt securities. The following describes some of the risks associated with fixed income debt securities:

Interest Rate Risk. Debt securities have varying levels of sensitivity to changes in interest rates. In general, the price of a debt security can fall when interest rates rise and can rise when interest rates fall. Securities with longer maturities and mortgage securities can be more sensitive to interest rate changes although they usually offer higher yields to compensate investors for the greater risks. The longer the maturity of the security, the greater the impact a change in interest rates could have on the security's price. In addition, short-term and long-term interest rates do not necessarily move in the same amount or the same direction. Short-term securities tend to react to changes in short-term interest rates and long-term securities tend to react to changes in long-term interest rates.

Credit Risk. Fixed income securities have speculative characteristics and changes in economic conditions or other circumstances are more likely to lead to a weakened capacity of those issuers to make principal or interest payments, as compared to issuers of more highly rated securities.

Extension Risk. The Fund is subject to the risk that an issuer will exercise its right to pay principal on an obligation held by the Fund (such as mortgage-backed securities) later than expected. This may happen when there is a rise in interest rates. These events may lengthen the duration (i.e. interest rate sensitivity) and potentially reduce the value of these securities.

Prepayment Risk. Certain types of debt securities, such as mortgage-backed securities, have yield and maturity characteristics corresponding to underlying assets. Unlike traditional debt securities, which may pay a fixed rate of interest until maturity when the entire principal amount comes due, payments on certain mortgage-backed securities may include both interest and a partial payment of principal. Besides the scheduled repayment of principal, payments of principal may result from the voluntary prepayment, refinancing, or foreclosure of the underlying mortgage loans.

Securities subject to prepayment are less effective than other types of securities as a means of "locking in" attractive long-term interest rates. One reason is the need to reinvest prepayments of principal; another is the possibility of significant unscheduled prepayments resulting from declines in interest rates. These prepayments would have to be reinvested at lower rates. As a result, these securities may have less potential for capital appreciation during periods of declining interest rates than other securities of comparable maturities, although they may have a similar risk of decline in market value during periods of rising interest rates. Prepayments may also significantly shorten the effective maturities of these securities, especially during periods of declining interest rates. Conversely, during periods of rising interest rates, a reduction in prepayments may increase the effective maturities of these securities, subjecting them to a greater risk of decline in market value in response to rising interest rates than traditional debt securities, and, therefore, potentially increasing the volatility of the Fund.

At times, some of the mortgage-backed securities in which the Fund may invest will have higher than market interest rates and therefore will be purchased at a premium above their par value. Prepayments may cause losses in securities purchased at a premium, as unscheduled prepayments, which are made at par, will cause the Fund to experience a loss equal to any unamortized premium.

Certificates of Deposit and Bankers' Acceptances

The Fund may invest in certificates of deposit and bankers' acceptances, which are considered to be short-term money market instruments.

Certificates of deposit are receipts issued by a depository institution in exchange for the deposit of funds. The issuer agrees to pay the amount deposited plus interest to the bearer of the receipt on the date specified on the certificate. The certificate usually can be traded in the secondary market prior to maturity. Bankers' acceptances typically arise from short-term credit arrangements designed to enable businesses to obtain funds to finance commercial transactions. Generally, an acceptance is a time draft drawn on a bank by an exporter or an importer to obtain a stated amount of funds to pay for specific merchandise. The draft is then "accepted" by a bank that, in effect, unconditionally guarantees to pay the face value of the instrument on its maturity date. The acceptance may then be held by the accepting bank as an earning asset or it may be sold in the secondary market at the going rate of discount for a specific maturity. Although maturities for acceptances can be as long as 270 days, most acceptances have maturities of six months or less.

Commercial Paper

The Fund may purchase commercial paper. Commercial paper consists of short-term (usually from 1 to 270 days) unsecured promissory notes issued by corporations in order to finance their current operations. It may be secured by letters of credit, a surety bond or other forms of collateral. Commercial paper is usually repaid at maturity by the

issuer from the proceeds of the issuance of new commercial paper. As a result, investment in commercial paper is subject to the risk the issuer cannot issue enough new commercial paper to satisfy its outstanding commercial paper, also known as rollover risk. Commercial paper may become illiquid or may suffer from reduced liquidity in certain circumstances. Like all fixed income securities, commercial paper prices are susceptible to fluctuations in interest rates. If interest rates rise, commercial paper prices will decline. The short-term nature of a commercial paper investment makes it less susceptible to interest rate risk than many other fixed income securities because interest rate risk typically increases as maturity lengths increase. Commercial paper tends to yield smaller returns than longer-term corporate debt because securities with shorter maturities typically have lower effective yields than those with longer maturities. As with all fixed income securities, there is a chance that the issuer will default on its commercial paper obligation.

Time Deposits and Variable Rate Notes

The Fund may invest in fixed time deposits, whether or not subject to withdrawal penalties.

The commercial paper obligations, which the Fund may buy are unsecured and may include variable rate notes. The nature and terms of a variable rate note (i.e., a “Master Note”) permit the Fund to invest fluctuating amounts at varying rates of interest pursuant to a direct arrangement between the Fund as Lender, and the issuer, as borrower. It permits daily changes in the amounts borrowed. The Fund has the right at any time to increase, up to the full amount stated in the note agreement, or to decrease the amount outstanding under the note. The issuer may prepay at any time and without penalty any part of or the full amount of the note. The note may or may not be backed by one or more bank letters of credit. Because these notes are direct lending arrangements between the Fund and the issuer, it is not generally contemplated that they will be traded; moreover, there is currently no secondary market for them. Except as specifically provided in the Prospectus, there is no limitation on the type of issuer from whom these notes may be purchased; however, in connection with such purchase and on an ongoing basis, the Fund’s advisor will consider the earning power, cash flow and other liquidity ratios of the issuer, and its ability to pay principal and interest on demand, including a situation in which all holders of such notes made demand simultaneously. Variable rate notes are subject to the Fund’s investment restriction on illiquid securities unless such notes can be put back to the issuer on demand within seven days.

Insured Bank Obligations

The Fund may invest in insured bank obligations. The Federal Deposit Insurance Corporation (“FDIC”) insures the deposits of federally insured banks and savings and loan associations (collectively referred to as “banks”) up to \$250,000. The Fund may purchase bank obligations that are fully insured as to principal by the FDIC. Currently, to remain fully insured as to principal, these investments must be limited to \$250,000 per

bank; if the principal amount and accrued interest together exceed \$250,000, the excess principal and accrued interest will not be insured. Insured bank obligations may have limited marketability.

High Yield Securities

The Fund may invest in high yield securities. High yield, high risk bonds are securities that are generally rated below investment grade by the primary rating agencies (BB+ or lower by S&P and Ba1 or lower by Moody's). Other terms used to describe such securities include "lower rated bonds," "non-investment grade bonds," "below investment grade bonds," and "junk bonds." These securities are considered to be high-risk investments. The risks include the following:

Greater Risk of Loss. These securities are regarded as predominately speculative. There is a greater risk that issuers of lower rated securities will default than issuers of higher rated securities. Issuers of lower rated securities generally are less creditworthy and may be highly indebted, financially distressed, or bankrupt. These issuers are more vulnerable to real or perceived economic changes, political changes or adverse industry developments. In addition, high yield securities are frequently subordinated to the prior payment of senior indebtedness. If an issuer fails to pay principal or interest, the Fund would experience a decrease in income and a decline in the market value of its investments.

Sensitivity to Interest Rate and Economic Changes. The income and market value of lower-rated securities may fluctuate more than higher rated securities. Although non-investment grade securities tend to be less sensitive to interest rate changes than investment grade securities, non-investment grade securities are more sensitive to short-term corporate, economic and market developments. During periods of economic uncertainty and change, the market price of the investments in lower-rated securities may be volatile. The default rate for high yield bonds tends to be cyclical, with defaults rising in periods of economic downturn. For example, in 2000, 2001 and 2002, the default rate for high yield securities was significantly higher than in the prior or subsequent years.

Valuation Difficulties. It is often more difficult to value lower rated securities than higher rated securities. If an issuer's financial condition deteriorates, accurate financial and business information may be limited or unavailable. In addition, the lower rated investments may be thinly traded and there may be no established secondary market. Because of the lack of market pricing and current information for investments in lower rated securities, valuation of such investments is much more dependent on judgment than is the case with higher rated securities.

Liquidity. There may be no established secondary or public market for investments in lower rated securities. Such securities are frequently traded in markets that may be relatively less liquid than the market for higher rated securities. In addition, relatively few institutional purchasers may hold a major portion of an issue of lower-rated securities at times. As a result, the Fund may be required to sell investments at

substantial losses or retain them indefinitely when an issuer's financial condition is deteriorating.

Credit Quality. Credit quality of non-investment grade securities can change suddenly and unexpectedly, and even recently-issued credit ratings may not fully reflect the actual risks posed by a particular high-yield security.

New Legislation. Future legislation may have a possible negative impact on the market for high yield, high risk bonds. As an example, in the late 1980's, legislation required federally-insured savings and loan associations to divest their investments in high yield, high risk bonds. New legislation, if enacted, could have a material negative effect on the Fund's investments in lower rated securities.

High yield, high risk investments may include the following:

Straight fixed-income debt securities. These include bonds and other debt obligations that bear a fixed or variable rate of interest payable at regular intervals and have a fixed or resettable maturity date. The particular terms of such securities vary and may include features such as call provisions and sinking funds.

Zero-coupon debt securities. These bear no interest obligation but are issued at a discount from their value at maturity. When held to maturity, their entire return equals the difference between their issue price and their maturity value.

Zero-fixed-coupon debt securities. These are zero-coupon debt securities that convert on a specified date to interest-bearing debt securities.

Pay-in-kind bonds. These are bonds which allow the issuer, at its option, to make current interest payments on the bonds either in cash or in additional bonds. These are bonds sold without registration under the Securities Act of 1933, as amended ("1933 Act"), usually to a relatively small number of institutional investors.

Convertible Securities. These are bonds or preferred stock that may be converted to common stock.

Preferred Stock. These are stocks that generally pay a dividend at a specified rate and have preference over common stock in the payment of dividends and in liquidation.

Loan Participations and Assignments. These are participations in, or assignments of all or a portion of loans to corporations or to governments, including governments of less developed countries ("LDCs").

Securities issued in connection with Reorganizations and Corporate Restructurings. In connection with reorganizing or restructuring of an issuer, an issuer may issue common stock or other securities to holders of its debt securities. The Fund may hold such common stock and other securities even if it does not invest in such securities.

Municipal Government Obligations

In general, municipal obligations are debt obligations issued by or on behalf of states, territories and possessions of the United States (including the District of Columbia) and their political subdivisions, agencies and instrumentalities. Municipal obligations generally include debt obligations issued to obtain funds for various public purposes. Certain types of municipal obligations are issued in whole or in part to obtain funding for privately operated facilities or projects. Municipal obligations include general obligation bonds, revenue bonds, industrial development bonds, notes and municipal lease obligations. Municipal obligations also include additional obligations, the interest on which is exempt from federal income tax, that may become available in the future as long as the Board of the Fund determines that an investment in any such type of obligation is consistent with the Fund's investment objectives. Municipal obligations may be fully or partially backed by local government, the credit of a private issuer, current or anticipated revenues from a specific project or specific assets or domestic or foreign entities providing credit support such as letters of credit, guarantees or insurance.

Bonds and Notes. General obligation bonds are secured by the issuer's pledge of its full faith, credit and taxing power for the payment of interest and principal. Revenue bonds are payable only from the revenues derived from a project or facility or from the proceeds of a specified revenue source. Industrial development bonds are generally revenue bonds secured by payments from and the credit of private users. Municipal notes are issued to meet the short-term funding requirements of state, regional and local governments. Municipal notes include tax anticipation notes, bond anticipation notes, revenue anticipation notes, tax and revenue anticipation notes, construction loan notes, short-term discount notes, tax-exempt commercial paper, demand notes and similar instruments.

Municipal Lease Obligations. Municipal lease obligations may take the form of a lease, an installment purchase or a conditional sales contract. They are issued by state and local governments and authorities to acquire land, equipment and facilities, such as vehicles, telecommunications and computer equipment and other capital assets. The Fund may invest in Underlying Funds that purchase these lease obligations directly, or it may purchase participation interests in such lease obligations (See "Participation Interests" section). States have different requirements for issuing municipal debt and issuing municipal leases. Municipal leases are generally subject to greater risks than general obligation or revenue bonds because they usually contain a "non-appropriation" clause, which provides that the issuer is not obligated to make payments on the obligation in future years unless funds have been appropriated for this purpose each year. Such non-appropriation clauses are required to avoid the municipal lease obligations from being treated as debt for state debt restriction purposes. Accordingly, such obligations are subject to "non-appropriation" risk. Municipal leases may be secured by the underlying capital asset and it may be difficult to dispose of any such asset in the event of non-appropriation or other default.

United States Government Obligations

These consist of various types of marketable securities issued by the United States Treasury, i.e., bills, notes and bonds. Such securities are direct obligations of the United States government and differ mainly in the length of their maturity. Treasury bills, the most frequently issued marketable government security, have a maturity of up to one year and are issued on a discount basis. The Fund may also invest in Treasury Inflation-Protected Securities (TIPS). TIPS are special types of treasury bonds that were created in order to offer bond investors protection from inflation. The values of the TIPS are automatically adjusted to the inflation rate as measured by the Consumer Price Index (CPI). If the CPI goes up by half a percent, the value of the bond (the TIPS) would also go up by half a percent. If the CPI falls, the value of the bond does not fall because the government guarantees that the original investment will stay the same. TIPS decline in value when real interest rates rise. However, in certain interest rate environments, such as when real interest rates are rising faster than nominal interest rates, TIPS may experience greater losses than other fixed income securities with similar duration.

United States Government Agency Obligations

These consist of debt securities issued by agencies and instrumentalities of the United States government, including the various types of instruments currently outstanding or which may be offered in the future. Agencies include, among others, the Federal Housing Administration, government National Mortgage Association ("GNMA"), Farmer's Home Administration, Export-Import Bank of the United States, Maritime Administration, and General Services Administration. Instrumentalities include, for example, each of the Federal Home Loan Banks, the National Bank for Cooperatives, the Federal Home Loan Mortgage Corporation ("FHLMC"), the Farm Credit Banks, the Federal National Mortgage Association ("FNMA"), and the United States Postal Service. These securities are either: (i) backed by the full faith and credit of the United States government (e.g., United States Treasury Bills); (ii) guaranteed by the United States Treasury (e.g., GNMA mortgage-backed securities); (iii) supported by the issuing agency's or instrumentality's right to borrow from the United States Treasury (e.g., FNMA Discount Notes); or (iv) supported only by the issuing agency's or instrumentality's own credit (e.g., Tennessee Valley Association). On September 7, 2008, the U.S. Treasury Department and the Federal Housing Finance Authority (the "FHFA") announced that FNMA and FHLMC had been placed into conservatorship, a statutory process designed to stabilize a troubled institution with the objective of returning the entity to normal business operations. The U.S. Treasury Department and the FHFA at the same time established a secured lending facility and a Secured Stock Purchase Agreement with both FNMA and FHLMC to ensure that each entity had the ability to fulfill its financial obligations. The FHFA announced that it does not anticipate any disruption in pattern of payments or ongoing business operations of FNMA and FHLMC.

Government-related guarantors (i.e. not backed by the full faith and credit of the United States Government) include FNMA and FHLMC. FNMA is a government-sponsored corporation owned entirely by private stockholders. It is subject to general regulation by the Secretary of Housing and Urban Development. FNMA purchases conventional (i.e., not insured or guaranteed by any government agency) residential mortgages from a list of approved seller/servicers which include state and federally chartered savings and loan associations, mutual savings banks, commercial banks and credit unions and mortgage bankers. Pass-through securities issued by FNMA are guaranteed as to timely payment of principal and interest by FNMA but are not backed by the full faith and credit of the United States Government.

FHLMC was created by Congress in 1970 for the purpose of increasing the availability of mortgage credit for residential housing. It is a government-sponsored corporation formerly owned by the twelve Federal Home Loan Banks and now owned entirely by private stockholders. FHLMC issues Participation Certificates ("PC's"), which represent interests in conventional mortgages from FHLMC's national portfolio. FHLMC guarantees the timely payment of interest and ultimate collection of principal, but PCs are not backed by the full faith and credit of the United States Government. Commercial banks, savings and loan institutions, private mortgage insurance companies, mortgage bankers and other secondary market issuers also create pass-through pools of conventional residential mortgage loans. Such issuers may, in addition, be the originators and/or servicers of the underlying mortgage loans as well as the guarantors of the mortgage-related securities. Pools created by such nongovernmental issuers generally offer a higher rate of interest than government and government-related pools because there are no direct or indirect government or agency guarantees of payments in the former pools. However, timely payment of interest and principal of these pools may be supported by various forms of insurance or guarantees, including individual loan, title, pool and hazard insurance and letters of credit. The insurance and guarantees are issued by governmental entities, private insurers and the mortgage poolers.

Mortgage Pass-Through Securities

Interests in pools of mortgage pass-through securities differ from other forms of debt securities (which normally provide periodic payments of interest in fixed amounts and the payment of principal in a lump sum at maturity or on specified call dates). Instead, mortgage pass-through securities provide monthly payments consisting of both interest and principal payments. In effect, these payments are a "pass-through" of the monthly payments made by the individual borrowers on the underlying residential mortgage loans, net of any fees paid to the issuer or guarantor of such securities. Unscheduled payments of principal may be made if the underlying mortgage loans are repaid or refinanced or the underlying properties are foreclosed, thereby shortening the securities' weighted average life. Some mortgage pass-through securities (such as securities guaranteed by GNMA) are described as "modified pass-through securities." These securities entitle the holder to receive all interest and principal payments owed

on the mortgage pool, net of certain fees, on the scheduled payment dates regardless of whether the mortgagor actually makes the payment.

The principal governmental guarantor of mortgage pass-through securities is GNMA. GNMA is authorized to guarantee, with the full faith and credit of the U.S. Treasury, the timely payment of principal and interest on securities issued by lending institutions approved by GNMA (such as savings and loan institutions, commercial banks and mortgage bankers) and backed by pools of mortgage loans. These mortgage loans are either insured by the Federal Housing Administration or guaranteed by the Veterans Administration. A “pool” or group of such mortgage loans is assembled and after being approved by GNMA, is offered to investors through securities dealers.

Government-related guarantors of mortgage pass-through securities (i.e., not backed by the full faith and credit of the U.S. Treasury) include FNMA and FHLMC. FNMA is a government-sponsored corporation owned entirely by private stockholders. It is subject to general regulation by the Secretary of Housing and Urban Development. FNMA purchases conventional (i.e., not insured or guaranteed by any government agency) residential mortgages from a list of approved sellers/servicers which include state and federally chartered savings and loan associations, mutual savings banks, commercial banks and credit unions and mortgage bankers. Mortgage pass-through securities issued by FNMA are guaranteed as to timely payment of principal and interest by FNMA but are not backed by the full faith and credit of the U.S. Treasury.

FHLMC was created by Congress in 1970 for the purpose of increasing the availability of mortgage credit for residential housing. It is a U.S. government-sponsored corporation formerly owned by the twelve Federal Home Loan Banks and now owned entirely by private stockholders. FHLMC issues Participation Certificates (“PCs”), which represent interests in conventional mortgages from FHLMC’s national portfolio. FHLMC guarantees the timely payment of interest and ultimate collection of principal, but PCs are not backed by the full faith and credit of the U.S. Treasury.

Commercial banks, savings and loan institutions, private mortgage insurance companies, mortgage bankers and other secondary market issuers also create pass-through pools of conventional residential mortgage loans. Such issuers may, in addition, be the originators and/or servicers of the underlying mortgage loans as well as the guarantors of the mortgage pass-through securities. The Fund does not purchase interests in pools created by such non-governmental issuers.

Resets. The interest rates paid on the Adjustable Rate Mortgage Securities (“ARMs”) in which the Fund may invest generally are readjusted or reset at intervals of one year or less to an increment over some predetermined interest rate index. There are two main categories of indices: those based on U.S. Treasury securities and those derived from a calculated measure, such as a cost of funds index or a moving average of mortgage rates. Commonly utilized indices include the one-year and five-year constant maturity Treasury Note rates, the three-month Treasury Bill rate, the 180-day Treasury Bill rate, rates on longer-term Treasury securities, the National Median Cost of

Funds, the one-month or three-month London Interbank Offered Rate (LIBOR), the prime rate of a specific bank, or commercial paper rates. Some indices, such as the one-year constant maturity Treasury Note rate, closely mirror changes in market interest rate levels. Others tend to lag changes in market rate levels and tend to be somewhat less volatile.

Caps and Floors. The underlying mortgages which collateralize the ARMs in which the Fund invests will frequently have caps and floors which limit the maximum amount by which the loan rate to the residential borrower may change up or down: (1) per reset or adjustment interval, and (2) over the life of the loan. Some residential mortgage loans restrict periodic adjustments by limiting changes in the borrower's monthly principal and interest payments rather than limiting interest rate changes. These payment caps may result in negative amortization. The value of mortgage securities in which the Fund invests may be affected if market interest rates rise or fall faster and farther than the allowable caps or floors on the underlying residential mortgage loans. Additionally, even though the interest rates on the underlying residential mortgages are adjustable, amortization and prepayments may occur, thereby causing the effective maturities of the mortgage securities in which the Fund invests to be shorter than the maturities stated in the underlying mortgages.

Foreign Securities

The Fund may invest in securities of foreign issuers, ETFs and other investment companies that hold a portfolio of foreign securities. Investing in securities of foreign companies and countries involves certain considerations and risks that are not typically associated with investing in U.S. government securities and securities of domestic companies. There may be less publicly available information about a foreign issuer than a domestic one, and foreign companies are not generally subject to uniform accounting, auditing and financial standards and requirements comparable to those applicable to U.S. companies. There may also be less government supervision and regulation of foreign securities exchanges, brokers and listed companies than exists in the United States. Interest and dividends paid by foreign issuers may be subject to withholding and other foreign taxes, which may decrease the net return on such investments as compared to dividends and interest paid to the Fund by domestic companies or the U.S. government. There may be the possibility of expropriations, seizure or nationalization of foreign deposits, confiscatory taxation, political, economic or social instability or diplomatic developments that could affect assets of the Fund held in foreign countries. Finally, the establishment of exchange controls or other foreign governmental laws or restrictions could adversely affect the payment of obligations.

To the extent the Fund's currency exchange transactions do not fully protect the Fund against adverse changes in currency exchange rates, decreases in the value of currencies of the foreign countries in which the Fund will invest relative to the U.S. dollar will result in a corresponding decrease in the U.S. dollar value of the Fund's assets

denominated in those currencies (and possibly a corresponding increase in the amount of securities required to be liquidated to meet distribution requirements). Conversely, increases in the value of currencies of the foreign countries in which the Fund invests relative to the U.S. dollar will result in a corresponding increase in the U.S. dollar value of the Fund's assets (and possibly a corresponding decrease in the amount of securities to be liquidated).

Emerging Markets Securities. The Fund may purchase securities of emerging market issuers and ETFs and other closed end funds that invest in emerging market securities. Investing in emerging market securities imposes risks different from, or greater than, risks of investing in foreign developed countries. These risks include: smaller market capitalization of securities markets, which may suffer periods of relative illiquidity; significant price volatility; restrictions on foreign investment; possible repatriation of investment income and capital. In addition, foreign investors may be required to register the proceeds of sales; future economic or political crises could lead to price controls, forced mergers, expropriation or confiscatory taxation, seizure, nationalization, or creation of government monopolies. The currencies of emerging market countries may experience significant declines against the U.S. dollar, and devaluation may occur subsequent to investments in these currencies by the Fund. Inflation and rapid fluctuations in inflation rates have had, and may continue to have, negative effects on the economies and securities markets of certain emerging market countries.

Additional risks of emerging markets securities may include: greater social, economic and political uncertainty and instability; more substantial governmental involvement in the economy; less governmental supervision and regulation; unavailability of currency hedging techniques; companies that are newly organized and small; differences in auditing and financial reporting standards, which may result in unavailability of material information about issuers; and less developed legal systems. In addition, emerging securities markets may have different clearance and settlement procedures, which may be unable to keep pace with the volume of securities transactions or otherwise make it difficult to engage in such transactions. Settlement problems may cause the Fund to miss attractive investment opportunities, hold a portion of its assets in cash pending investment, or be delayed in disposing of a portfolio security. Such a delay could result in possible liability to a purchaser of the security.

Depository Receipts. The Fund may invest in sponsored and unsponsored American Depositary Receipts ("ADRs"), which are receipts issued by an American bank or trust company evidencing ownership of underlying securities issued by a foreign issuer. ADRs, in registered form, are designed for use in U.S. securities markets. Unsponsored ADRs may be created without the participation of the foreign issuer. Holders of these ADRs generally bear all the costs of the ADR facility, whereas foreign issuers typically bear certain costs in a sponsored ADR. The bank or trust company depository of an unsponsored ADR may be under no obligation to distribute shareholder communications received from the foreign issuer or to pass through voting rights. Many of the risks described above regarding foreign securities apply to investments in ADRs.

Illiquid and Restricted Securities

The Fund may invest up to 15% of its net assets in illiquid securities. Illiquid securities include securities subject to contractual or legal restrictions on resale (e.g., because they have not been registered under the Securities Act of 1933, as amended (the "Securities Act")) and securities that are otherwise not readily marketable (e.g., because trading in the security is suspended or because market makers do not exist or will not entertain bids or offers). Securities that have not been registered under the Securities Act are referred to as private placements or restricted securities and are purchased directly from the issuer or in the secondary market. Foreign securities that are freely tradable in their principal markets are not considered to be illiquid.

Restricted and other illiquid securities may be subject to the potential for delays on resale and uncertainty in valuation. The Fund might be unable to dispose of illiquid securities promptly or at reasonable prices and might thereby experience difficulty in satisfying redemption requests from shareholders. The Underlying Fund might have to register restricted securities in order to dispose of them, resulting in additional expense and delay. Adverse market conditions could impede such a public offering of securities.

A large institutional market exists for certain securities that are not registered under the Securities Act, including foreign securities. The fact that there are contractual or legal restrictions on resale to the general public or to certain institutions may not be indicative of the liquidity of such investments. Rule 144A under the Securities Act allows such a broader institutional trading market for securities otherwise subject to restrictions on resale to the general public. Rule 144A establishes a "safe harbor" from the registration requirements of the Securities Act for resale of certain securities to qualified institutional buyers. Rule 144A has produced enhanced liquidity for many restricted securities, and market liquidity for such securities may continue to expand as a result of this regulation and the consequent existence of the PORTAL system, which is an automated system for the trading, clearance and settlement of unregistered securities of domestic and foreign issuers sponsored by FINRA.

Under guidelines adopted by the Trust's Board, the adviser of the Fund may determine that particular Rule 144A securities, and commercial paper issued in reliance on the private placement exemption from registration afforded by Section 4(2) of the

Securities Act, are liquid even though they are not registered. A determination of whether such a security is liquid or not is a question of fact. In making this determination, the adviser will consider, as it deems appropriate under the circumstances and among other factors: (1) the frequency of trades and quotes for the security; (2) the number of dealers willing to purchase or sell the security; (3) the number of other potential purchasers of the security; (4) dealer undertakings to make a market in the security; (5) the nature of the security (e.g., debt or equity, date of maturity, terms of dividend or interest payments, and other material terms) and the nature of the marketplace trades (e.g., the time needed to dispose of the security, the method of soliciting offers, and the mechanics of transfer); and (6) the rating of the security and the financial condition and prospects of the issuer. In the case of commercial paper, the adviser will also determine that the paper (1) is not traded flat or in default as to principal and interest, and (2) is rated in one of the two highest rating categories by at least two National Statistical Rating Organization (“NRSRO”) or, if only one NRSRO rates the security, by that NRSRO, or, if the security is unrated, the adviser determines that it is of equivalent quality.

Rule 144A securities and Section 4(2) commercial paper that have been deemed liquid as described above will continue to be monitored by the Fund adviser to determine if the security is no longer liquid as the result of changed conditions. Investing in Rule 144A securities or Section 4(2) commercial paper could have the effect of increasing the amount of the Fund's assets invested in illiquid securities if institutional buyers are unwilling to purchase such securities.

Lending Portfolio Securities

For the purpose of achieving income, the Fund may lend its portfolio securities, provided (1) the loan is secured continuously by collateral consisting of U.S. Government securities or cash or cash equivalents (cash, U.S. Government securities, negotiable certificates of deposit, bankers' acceptances or letters of credit) maintained on a daily mark-to-market basis in an amount at least equal to the current market value of the securities loaned, (2) the Fund may at any time call the loan and obtain the return of securities loaned, (3) the Fund will receive any interest or dividends received on the loaned securities, and (4) the aggregate value of the securities loaned will not at any time exceed one-third of the total assets of the Fund.

Real Estate Investment Trusts

The Fund may invest in securities of real estate investment trusts (“REITs”). REITs are publicly traded corporations or trusts that specialize in acquiring, holding and managing residential, commercial or industrial real estate. A REIT is not taxed at the entity level on income distributed to its shareholders or unitholders if it distributes to shareholders or unitholders at least 95% of its taxable income for each taxable year and complies with regulatory requirements relating to its organization, ownership, assets and income.

REITs generally can be classified as “Equity REITs”, “Mortgage REITs” and “Hybrid REITs.” An Equity REIT invests the majority of its assets directly in real property and derives its income primarily from rents and from capital gains on real estate appreciation, which are realized through property sales. A Mortgage REIT invests the majority of its assets in real estate mortgage loans and services its income primarily from interest payments. A Hybrid REIT combines the characteristics of an Equity REIT and a Mortgage REIT. Although the Fund can invest in all three kinds of REITs, its emphasis is expected to be on investments in Equity REITs.

Investments in the real estate industry involve particular risks. The real estate industry has been subject to substantial fluctuations and declines on a local, regional and national basis in the past and may continue to be in the future. Real property values and income from real property continue to be in the future. Real property values and income from real property may decline due to general and local economic conditions, overbuilding and increased competition, increases in property taxes and operating expenses, changes in zoning laws, casualty or condemnation losses, regulatory limitations on rents, changes in neighborhoods and in demographics, increases in market interest rates, or other factors. Factors such as these may adversely affect companies that own and operate real estate directly, companies that lend to such companies, and companies that service the real estate industry.

Investments in REITs also involve risks. Equity REITs will be affected by changes in the values of and income from the properties they own, while Mortgage REITs may be affected by the credit quality of the mortgage loans they hold. In addition, REITs are dependent on specialized management skills and on their ability to generate cash flow for operating purposes and to make distributions to shareholders or unitholders REITs may have limited diversification and are subject to risks associated with obtaining financing for real property, as well as to the risk of self-liquidation. REITs also can be adversely affected by their failure to qualify for tax-free pass-through treatment of their income under the Internal Revenue Code of 1986, as amended, or their failure to maintain an exemption from registration under the 1940 Act. By investing in REITs indirectly through the Fund, a shareholder bears not only a proportionate share of the expenses of the Fund, but also may indirectly bear similar expenses of some of the REITs in which it invests.

Repurchase Agreements

The Fund may enter into repurchase agreements. In a repurchase agreement, an investor (such as the Fund) purchases a security (known as the "underlying security") from a securities dealer or bank. Any such dealer or bank must be deemed creditworthy by the Advisor. At that time, the bank or securities dealer agrees to repurchase the underlying security at a mutually agreed upon price on a designated future date. The repurchase price may be higher than the purchase price, the difference being income to the Fund, or the purchase and repurchase prices may be the same, with interest at an agreed upon rate due to the Fund on repurchase. In either case, the income to the Fund generally will be unrelated to the interest rate on the underlying securities. Repurchase

agreements must be "fully collateralized," in that the market value of the underlying securities (including accrued interest) must at all times be equal to or greater than the repurchase price. Therefore, a repurchase agreement can be considered a loan collateralized by the underlying securities.

Repurchase agreements are generally for a short period of time, often less than a week, and will generally be used by the Fund to invest excess cash or as part of a temporary defensive strategy. Repurchase agreements that do not provide for payment within seven days will be treated as illiquid securities. In the event of a bankruptcy or other default by the seller of a repurchase agreement, the Fund could experience both delays in liquidating the underlying security and losses. These losses could result from: (a) possible decline in the value of the underlying security while the Fund is seeking to enforce its rights under the repurchase agreement; (b) possible reduced levels of income or lack of access to income during this period; and (c) expenses of enforcing its rights.

When-Issued, Forward Commitments and Delayed Settlements

The Fund may purchase and sell securities on a when-issued, forward commitment or delayed settlement basis. In this event, the Custodian (as defined under the section entitled "Custodian") will segregate liquid assets equal to the amount of the commitment in a separate account. Normally, the Custodian will set aside portfolio securities to satisfy a purchase commitment. In such a case, the Fund may be required subsequently to segregate additional assets in order to assure that the value of the account remains equal to the amount of the Fund's commitment. It may be expected that the Fund's net assets will fluctuate to a greater degree when it sets aside portfolio securities to cover such purchase commitments than when it sets aside cash.

The Fund does not intend to engage in these transactions for speculative purposes but only in furtherance of its investment objectives. Because the Fund will segregate liquid assets to satisfy its purchase commitments in the manner described, the Fund's liquidity and the ability of the Fund's adviser to manage them may be affected in the event the Fund's forward commitments, commitments to purchase when-issued securities and delayed settlements ever exceeded 15% of the value of its net assets.

The Fund will purchase securities on a when-issued, forward commitment or delayed settlement basis only with the intention of completing the transaction. If deemed advisable as a matter of investment strategy, however, the Fund may dispose of or renegotiate a commitment after it is entered into, and may sell securities it has committed to purchase before those securities are delivered to the Fund on the settlement date. In these cases the Fund may realize a taxable capital gain or loss. When the Fund engages in when-issued, forward commitment and delayed settlement transactions, it relies on the other party to consummate the trade. Failure of such party to do so may result in the Fund incurring a loss or missing an opportunity to obtain a price credited to be advantageous.

The market value of the securities underlying a when-issued purchase, forward commitment to purchase securities, or a delayed settlement and any subsequent fluctuations in their market value is taken into account when determining the market value of the Fund starting on the day the Fund agrees to purchase the securities. The Fund does not earn interest on the securities it has committed to purchase until it has paid for and delivered on the settlement date.

Short Sales

The Fund may sell securities short. A short sale is a transaction in which the Fund sells a security it does not own or have the right to acquire (or that it owns but does not wish to deliver) in anticipation that the market price of that security will decline.

When the Fund makes a short sale, the broker-dealer through which the short sale is made must borrow the security sold short and deliver it to the party purchasing the security. The Fund is required to make a margin deposit in connection with such short sales; the Fund may have to pay a fee to borrow particular securities and will often be obligated to pay over any dividends and accrued interest on borrowed securities.

If the price of the security sold short increases between the time of the short sale and the time the Fund covers its short position, the Fund will incur a loss; conversely, if the price declines, the Fund will realize a capital gain. Any gain will be decreased, and any loss increased, by the transaction costs described above. The successful use of short selling may be adversely affected by imperfect correlation between movements in the price of the security sold short and the securities being hedged.

To the extent the Fund sells securities short, it will provide collateral to the broker-dealer and (except in the case of short sales "against the box") will maintain additional asset coverage in the form of cash, U.S. government securities or other liquid securities with its custodian in a segregated account in an amount at least equal to the difference between the current market value of the securities sold short and any amounts required to be deposited as collateral with the selling broker (not including the proceeds of the short sale). The Fund does not intend to enter into short sales (other than short sales "against the box") if immediately after such sales the aggregate of the value of all collateral plus the amount in such segregated account exceeds 50% of the value of the Fund's net assets. This percentage may be varied by action of the Board of Trustees. A short sale is "against the box" to the extent the Fund contemporaneously owns, or has the right to obtain at no added cost, securities identical to those sold short.

INVESTMENT RESTRICTIONS

The Fund has adopted the following investment restrictions that may not be changed without approval by a “majority of the outstanding shares” of the Fund which, as used in this SAI, means the vote of the lesser of (a) 67% or more of the shares of the Fund represented at a meeting, if the holders of more than 50% of the outstanding shares of the Fund are present or represented by proxy, or (b) more than 50% of the outstanding shares of the Fund.

1. Borrowing Money. The Fund will not borrow money, except: (a) from a bank, provided that immediately after such borrowing there is an asset coverage of 300% for all borrowings of the Fund; or (b) from a bank or other persons for temporary purposes only, provided that such temporary borrowings are in an amount not exceeding 5% of the Fund’s total assets at the time when the borrowing is made.

2. Senior Securities. The Fund will not issue senior securities. This limitation is not applicable to activities that may be deemed to involve the issuance or sale of a senior security by the Fund, provided that the Fund’s engagement in such activities is consistent with or permitted by the Investment Company Act of 1940, as amended, the rules and regulations promulgated thereunder or interpretations of the SEC or its staff.

3. Underwriting. The Fund will not act as underwriter of securities issued by other persons. This limitation is not applicable to the extent that, in connection with the disposition of portfolio securities (including restricted securities), the Fund may be deemed an underwriter under certain federal securities laws.

4. Real Estate. The Fund will not purchase or sell real estate. This limitation is not applicable to investments in marketable securities that are secured by or represent interests in real estate. This limitation does not preclude the Fund from investing in mortgage-related securities or investing in companies engaged in the real estate business or that have a significant portion of their assets in real estate (including real estate investment trusts).

5. Commodities. The Fund will not purchase or sell commodities unless acquired as a result of ownership of securities or other investments. This limitation does not preclude the Fund from purchasing or selling options or futures contracts, from investing in securities or other instruments backed by commodities or from investing in companies which are engaged in a commodities business or have a significant portion of their assets in commodities.

6. Loans. The Fund will not make loans to other persons, except: (a) by loaning portfolio securities; (b) by engaging in repurchase agreements; or (c) by purchasing nonpublicly offered debt securities. For purposes of this limitation, the term “loans” shall not include the purchase of a portion of an issue of publicly distributed bonds, debentures or other securities.

7. Concentration. The Fund will not invest 25% or more of its total assets in a particular industry or group of industries. The Fund will not invest 25% or more of its total assets in any investment company that concentrates. This limitation is not applicable to investments in obligations issued or guaranteed by the U.S. government, its agencies and instrumentalities or repurchase agreements with respect thereto.

THE FOLLOWING ARE ADDITIONAL INVESTMENT LIMITATIONS OF THE FUND. THE FOLLOWING RESTRICTIONS ARE DESIGNATED AS NON-FUNDAMENTAL AND MAY BE CHANGED BY THE BOARD OF TRUSTEES OF THE TRUST WITHOUT THE APPROVAL OF SHAREHOLDERS.

1. Pledging. The Fund will not mortgage, pledge, hypothecate or in any manner transfer, as security for indebtedness, any assets of the Fund except as may be necessary in connection with borrowings described in limitation (1) above. Margin deposits, security interests, liens and collateral arrangements with respect to transactions involving options, futures contracts, short sales and other permitted investments and techniques are not deemed to be a mortgage, pledge or hypothecation of assets for purposes of this limitation.

2. Borrowing. The Fund will not purchase any security while borrowings representing more than one third of its total assets are outstanding.

3. Margin Purchases. The Fund will not purchase securities or evidences of interest thereon on "margin." This limitation is not applicable to short-term credit obtained by the Fund for the clearance of purchases and sales or redemption of securities, or to arrangements with respect to transactions involving options, futures contracts, short sales and other permitted investment techniques.

4. Illiquid Investments. The Fund will not hold 15% or more of its net assets in securities for which there are legal or contractual restrictions on resale and other illiquid securities.

If a restriction on the Fund's investments is adhered to at the time an investment is made, a subsequent change in the percentage of Fund assets invested in certain securities or other instruments, or change in average duration of the Fund's investment portfolio, resulting from changes in the value of the Fund's total assets, will not be considered a violation of the restriction; provided, however, that the asset coverage requirement applicable to borrowings shall be maintained in the manner contemplated by applicable law.

POLICIES AND PROCEDURES FOR DISCLOSURE OF PORTFOLIO HOLDINGS

The Trust has adopted policies and procedures that govern the disclosure of the Fund's portfolio holdings. These policies and procedures are designed to ensure that such disclosure is in the best interests of Fund shareholders.

It is the Trust's policy to: (1) ensure that any disclosure of portfolio holdings information is in the best interest of Trust shareholders; (2) protect the confidentiality of portfolio holdings information; (3) have procedures in place to guard against personal trading based on the information; and (4) ensure that the disclosure of portfolio holdings information does not create conflicts between the interests of the Trust's shareholders and those of the Trust's affiliates.

The Fund will disclose its portfolio holdings by mailing its annual and semi-annual reports to shareholders approximately two months after the end of the fiscal year and semi-annual period. The Fund may also disclose its portfolio holdings by mailing a quarterly report to its shareholders. In addition, the Fund will disclose its portfolio holdings reports on Forms N-CSR and Form N-Q two months after the end of each quarter/semi-annual period.

The Fund may, from time to time, make available month end portfolio holdings information on its website at www.lacerteguardianfund.com. The month end portfolio holdings are generally posted to the website within forty-five days of the end of each month and remain available until new information for the next month is posted.

The Fund may choose to make available to rating agencies such as Lipper, Morningstar or Bloomberg more frequently on a confidential basis.

Under limited circumstances, as described below, the Fund's portfolio holdings may be disclosed to, or known by, certain third parties in advance of their filing with the SEC on Form N-CSR or Form N-Q. In each case, a determination has been made that such advance disclosure is supported by a legitimate business purpose and that the recipient is subject to a duty to keep the information confidential.

- **The Adviser.** Personnel of the Fund's adviser, including personnel responsible for managing the Fund's portfolio, may have full daily access to Fund portfolio holdings since that information is necessary in order for the adviser to provide its management, administrative, and investment services to the Fund. As required for purposes of analyzing the impact of existing and future market changes on the prices, availability, demand and liquidity of such securities, as well as for the assistance of portfolio manager in the trading of such securities, adviser personnel may also release and discuss certain portfolio holdings with various broker-dealers.

- **Gemini Fund Services, LLC.** Gemini Fund Services, LLC is the transfer agent, fund accountant and administrator for the Fund; therefore, its personnel have full daily access to the Fund's portfolio holdings since that information is necessary in order for them to provide the agreed-upon services for the Trust.
- **Union Bank, National Association** is the custodian for the Fund; therefore, its personnel have full daily access to the Fund's portfolio holdings since that information is necessary in order for them to provide the agreed-upon services for the Fund.
- **Briggs, Bunting & Dougherty, LLP** is the Fund's independent registered public accounting firm; therefore, its personnel have access to the Fund's portfolio holdings in connection with auditing of the Fund's annual financial statements and providing assistance and consultation in connection with SEC filings.
- **Thompson Hine LLP.** Thompson Hine LLP is counsel to the Fund; therefore its personnel have access to the Fund's portfolio holdings in connection with the review of the Fund's annual and semi-annual shareholder reports and SEC filings.

Additions to List of Approved Recipients. The Fund's Chief Compliance Officer is the person responsible, and whose prior approval is required, for any disclosure of the Fund's portfolio securities at any time or to any persons other than those described above. In such cases, the recipient must have a legitimate business need for the information and must be subject to a duty to keep the information confidential. There are no ongoing arrangements in place with respect to the disclosure of portfolio holdings. In no event shall the Fund, the Adviser or any other party receive any direct or indirect compensation in connection with the disclosure of information about the Fund's portfolio holdings.

Compliance with Portfolio Holdings Disclosure Procedures. The Fund's Chief Compliance Officer will report periodically to the Board with respect to compliance with the Fund's portfolio holdings disclosure procedures, and from time to time will provide the Board any updates to the portfolio holdings disclosure policies and procedures.

There is no assurance that the Trust's policies on disclosure of portfolio holdings will protect the Fund from the potential misuse of holdings information by individuals or firms in possession of that information.

MANAGEMENT

The business of the Trust is managed under the direction of the Board in accordance with the Agreement and Declaration of Trust and the Trust’s By-laws (the “Governing Documents”), which have been filed with the SEC and are available upon request. The Board consists of five (5) individuals, four (4) of whom are not “interested persons” (as defined under the 1940 Act) of the Trust and the Adviser (“Independent Trustees”). Pursuant to the Governing Documents of the Trust, the Trustees shall elect officers including a President, a Secretary, a Treasurer, a Principal Executive Officer and a Principal Accounting Officer. The Board retains the power to conduct, operate and carry on the business of the Trust and has the power to incur and pay any expenses, which, in the opinion of the Board, are necessary or incidental to carry out any of the Trust’s purposes. The Trustees, officers, employees and agents of the Trust, when acting in such capacities, shall not be subject to any personal liability except for his or her own bad faith, willful misfeasance, gross negligence or reckless disregard of his or her duties. Following is a list of the Trustees and executive officers of the Trust and their principal occupation over the last five years. Unless otherwise noted, the address of each Trustee and Officer is 4020 South 147th Street, Suite 2, Omaha, Nebraska 68137.

Independent Trustees

Name, Address and Age	Position/Term of Office*	Principal Occupation During the Past Five Years	Number of Portfolios in Fund Complex**	Other Directorships held by Trustee
L. Merrill Bryan*** Age: 65	Trustee Since 2005	Retired. Formerly, Senior Vice President and Chief Information Officer of Union Pacific Corporation (a railroad company).	47	AdvisorOne Funds (6 portfolios)
Anthony J. Hertl Age: 59	Trustee Since 2005	Consultant to small and emerging businesses since 2000; Retired in 2000 as Vice President of Finance and Administration of Marymount College, Tarrytown, New York where he served in this capacity for four years. Prior thereto, he spent thirteen years at Prudential Securities in various management capacities including Chief Financial Officer – Specialty Finance Group, Director of Global Taxation and Capital Markets Controller. Mr. Hertl is also a Certified Public Accountant.	47	AdvisorOne Funds (6 portfolios); Satuit Capital Management Trust; The Z-Seven Fund, Inc. and Greenwich Advisors Trust

Gary W. Lanzen Age: 55	Trustee Since 2005	Chief Investment Officer (2006 – present), formerly President, Orizon Investment Counsel, LLC; Partner, Orizon Group, Inc. (a financial services company).	47	AdvisorOne Funds (6 portfolios)
Mark H. Taylor Age: 45	Trustee Since 2007	Professor, Department of Accountancy, Weatherhead School of Management, Case Western Reserve University since July 2009; Member, John P. Begley Endowed Chair in Accounting, Creighton University, 2002 – 2009; Auditing Standards Board, AICPA since 2008.	47	Lifetime Achievement Mutual Fund (LFTAX) (Director and Audit Committee Chairman)

Wolf 450 Wireless Blvd. Hauppauge, NY 11788 Age: 39	Treasurer Since June 2006	Director of Fund Administration, Gemini Fund Services, LLC (2006 – Present); Vice President, Fund Administration, Gemini Fund Services, LLC (2004 - 2006); Vice- President, GemCom, LLC (2004 - Present); Senior Fund Administrator, Gemini Fund Services, LLC (2001-2004).	N/A	N/A
Lynn Bowley 4020 So. 147th Street Omaha, NE 68137 Age: 50	Chief Compliance Officer Since June 2007	Compliance Officer of Northern Lights Compliance Services, LLC (01/07 – present); Vice President of Investment Support Services for Mutual of Omaha Companies (2002 – 2006).	N/A	N/A

* The term of office for each Trustee and Officer listed above will continue indefinitely.

** The term “Fund Complex” refers to the Northern Lights Fund Trust and the Northern Lights Variable Trust.

***From December 2006 through April 2007, L. Merrill Bryan, a non-interested trustee of the Trust, invested \$143,080 in a limited liability company (“LLC”). This investment is required to be disclosed because one of the other members of the LLC is under common control with the Fund’s distributor. As of May 2007, Mr. Bryan is no longer a member of the LLC.

**** Michael Miola is an “interested person” of the Trust as that term is defined under the 1940 Act, because of his affiliation with Gemini Fund Services, LLC, (the Trust’s Administrator, Fund Accountant, Transfer Agent) and Northern Lights Distributors, LLC (the Fund’s Distributor).

Board Committees

Audit Committee

The Board has an Audit Committee that consists of all the Trustees who are not “interested persons” of the Trust within the meaning of the 1940 Act. The Audit Committee’s responsibilities include: (i) recommending to the Board the selection, retention or termination of the Trust’s independent auditors; (ii) reviewing with the independent auditors the scope, performance and anticipated cost of their audit; (iii) discussing with the independent auditors certain matters relating to the Trust’s financial statements, including any adjustment to such financial statements recommended by

such independent auditors, or any other results of any audit; (iv) reviewing on a periodic basis a formal written statement from the independent auditors with respect to their independence, discussing with the independent auditors any relationships or services disclosed in the statement that may impact the objectivity and independence of the Trust's independent auditors and recommending that the Board take appropriate action in response thereto to satisfy itself of the auditor's independence; and (v) considering the comments of the independent auditors and management's responses thereto with respect to the quality and adequacy of the Trust's accounting and financial reporting policies and practices and internal controls. The Audit Committee operates pursuant to an Audit Committee Charter. The Audit Committee is responsible for seeking and reviewing nominee candidates for consideration as Independent Trustees as is from time to time considered necessary or appropriate. The Audit Committee generally will not consider shareholder nominees. The Audit Committee is also responsible for reviewing and setting Independent Trustee compensation from time to time when considered necessary or appropriate. During the past fiscal year, the Audit Committee held nine meetings.

Compensation

Effective April 1, 2009, each Trustee who is not affiliated with the Trust or Adviser will receive a quarterly fee of \$10,000, as well as reimbursement for any reasonable expenses incurred attending the meetings. The "interested persons" who serve as Trustees of the Trust receive no compensation for their services as Trustees. None of the executive officers receive compensation from the Trust.

Prior to March 31, 2009, each Trustee who is not affiliated with the Trust or Adviser will received a quarterly fee of \$7,500, as well as reimbursement for any reasonable expenses incurred attending the meetings. The table below details the amount of compensation the Trustees received from the Trust during the year ended December 31, 2008. The Trustees have attended all quarterly meetings. The Trust does not have a bonus, profit sharing, pension or retirement plan.

Name and Position	Aggregate Compensation From Trust **	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation From Trust and Fund Complex*** Paid to Directors
L. Merrill Bryan	\$30,000	None	None	\$40,000
Anthony J. Hertl	\$30,000	None	None	\$40,000
Gary Lanzen	\$30,000	None	None	\$40,000
Mark Taylor	\$30,000	None	None	\$40,000
Michael Miola*	None	None	None	None

*This Trustee is deemed to be an 'interested person' as defined in the 1940 Act as a result of his affiliation with Gemini Fund Services, LLC (the Trust's Administrator, Transfer Agent and Fund Accountant), Northern Lights Distributors, LLC (the Fund's Distributor) and Northern Lights Compliance Services, LLC (the Trust's compliance service provider).

**There are currently multiple series comprising the Trust. Trustees' fees will be allocated equally to each Fund in the Trust.

***The term "Fund Complex" refers to the Northern Lights Fund Trust and the Northern Lights Variable Trust.

Trustee Ownership

The following table indicates the dollar range of equity securities that each Trustee beneficially owned in the Fund as of December 31, 2008.

Name of Trustee	Dollar Range of Equity Securities in the Fund	Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by Trustee in Family of Investment Companies
L. Merrill Bryan	None	None
Anthony J. Hertl	None	None
Gary Lanzen	None	None
Mark Taylor	None	None
Michael Miola*	None	None

* This Trustee is deemed to be an 'interested person' as defined in the 1940 Act as a result of his affiliation with Gemini Fund Services, LLC (the Trust's Administrator, Transfer Agent and Fund Accountant), Northern Lights Distributors, LLC (the Funds' Distributor) and Northern Lights Compliance Services, LLC (the Trust's compliance service provider).

Management Ownership

As of December 31, 2008, the Trustees, as a group, owned no shares of the Fund (because it had not yet commenced operations) and less than 1.00% of the Fund Complex's outstanding shares.

CONTROL PERSONS AND PRINCIPAL HOLDERS

A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of a company or acknowledged the existence of control. As of the date of this SAI, the Fund could be deemed to be under control of the Adviser, which had voting authority with respect to approximately 100% of the value of the outstanding interests in the Fund on such date. However, it is expected that once the Fund commences investment operations and its shares are sold to the public that the Adviser's control will be diluted until such time as the Fund is controlled by its unaffiliated shareholders.

As of the date of this Statement of Additional Information, other than the Adviser and its affiliates, no shareholders of record owned 5% or more of the outstanding shares of the Fund.

INVESTMENT ADVISER

Lacerte Capital Advisers, LLC, 2811 McKinney Ave., Suite 206, Dallas, TX 75204, serves as investment adviser to the Fund (the "Adviser"). The Adviser was

established in April 2007, and also advises individuals, corporations and a pooled investment vehicle in addition to the Fund. Subject to the supervision and direction of the Trustees, the Adviser manages the Fund's securities and investments in accordance with the Fund's stated investment objectives and policies, makes investment decisions and places orders to purchase and sell securities on behalf of the Fund. The fee paid to the Adviser is governed by an investment advisory agreement ("Advisory Agreement") between the Trust, on behalf of the Fund and the Adviser.

Under the Advisory Agreement, the Adviser, under the supervision of the Board, agrees to invest the assets of the Fund in accordance with applicable law and the investment objective, policies and restrictions set forth in the Fund's current Prospectus and Statement of Additional Information, and subject to such further limitations as the Trust may from time to time impose by written notice to the Adviser. The Adviser shall act as the investment adviser to the Fund and, as such shall (i) obtain and evaluate such information relating to the economy, industries, business, securities markets and securities as it may deem necessary or useful in discharging its responsibilities here under, (ii) formulate a continuing program for the investment of the assets of the Fund in a manner consistent with its investment objective, policies and restrictions, and (iii) determine from time to time securities to be purchased, sold, retained or lent by the Fund, and implement those decisions, including the selection of entities with or through which such purchases, sales or loans are to be effected; provided, that the Adviser will place orders pursuant to its investment determinations either directly with the issuer or with a broker or dealer, and if with a broker or dealer, (a) will attempt to obtain the best price and execution of its orders, and (b) may nevertheless in its discretion purchase and sell portfolio securities from and to brokers who provide the Adviser with research, analysis, advice and similar services and pay such brokers in return a higher commission or spread than may be charged by other brokers. The Adviser also provides the Fund with all necessary office facilities and personnel for servicing the Fund's investments, compensates all officers, Trustees and employees of the Trust who are officers, directors or employees of the Adviser, and all personnel of the Fund or the Adviser performing services relating to research, statistical and investment activities. The Advisory Agreement was approved by the Board of the Trust, including by a majority of the Independent Trustees, at a meeting held on August 5, 2009.

Pursuant to the Advisory Agreement, the Adviser receives a variable performance-based fee. This fee is comprised of an annual base rate of 1.75% of average daily net assets (fulcrum fee), subject to a performance adjustment, in accordance with a rate schedule. The management fee will be the fulcrum fee (i.e., there will be no performance adjustment) if the Fund's performance is within positive or negative 2.00% (two percentage points) of the investment record of the S&P 500 Index over the performance period. If the difference between the Fund's performance and the investment record of the S&P 500 Index exceeds two percentage points, the fee will be adjusted either up or down 1.00%. The maximum annualized performance adjustment rate is plus or minus 1.00% (which would result from a performance differential of 2 percentage points or more between the Fund's performance and the investment record of the S&P 500 Index). The performance adjustment either increases or decreases the

management fee, depending on how well the Fund has performed relative to the Standard and Poor's 500 Index ("S&P 500 Index") over a performance period. The performance period is the most recent 12-month period (rolling 12-month period).

The Adviser has entered into an expense limitation agreement with the Fund to reduce its fees and to reimburse expenses, at least until January 31, 2011, such that total annual Fund operating expenses after fee deferral and/or reimbursement (exclusive of any taxes, interest, brokerage commissions, dividend expense on securities sold short, performance component of the management fee, acquired fund fees and expenses, or extraordinary expenses such as litigation or reorganization costs) will not exceed 2.50% and 2.75% for Class I and Class R shares respectively, subject to possible recoupment from the appropriate class of Fund shares in future years on a rolling three year basis (within the three years after the fees have been waived or reimbursed) if such recoupment can be achieved within the foregoing expense limits.

Expenses not expressly assumed by the Adviser under the Advisory Agreement are paid by the Fund. Under the terms of the Advisory Agreement, the Fund is responsible for the payment of the following expenses among others: (a) the fees payable to the Adviser, (b) the fees and expenses of Trustees who are not affiliated persons of the Adviser (c) the fees and certain expenses of the Custodian and Transfer and Dividend Disbursing Agent (as defined under the section entitled "Transfer Agent"), including the cost of maintaining certain required records of the Fund and of pricing the Fund's shares, (d) the charges and expenses of legal counsel and independent accountants for the Fund, (e) brokerage commissions and any issue or transfer taxes chargeable to the Fund in connection with its securities transactions, (f) all taxes and corporate fees payable by the Fund to governmental agencies, (g) the fees of any trade association of which the Fund may be a member, (h) the cost of share certificates representing shares of the Fund, (i) the cost of fidelity and liability insurance, (j) the fees and expenses involved in registering and maintaining registration of the Fund and of its shares with the SEC, qualifying its shares under state securities laws, including the preparation and printing of the Fund's registration statements and prospectuses for such purposes, (k) all expenses of shareholders and Trustees' meetings (including travel expenses of Trustees and officers of the Fund who are directors, officers or employees of the Adviser) and of preparing, printing and mailing reports, proxy statements and prospectuses to shareholders in the amount necessary for distribution to the shareholders and (l) litigation and indemnification expenses and other extraordinary expenses not incurred in the ordinary course of the Fund's business.

The Advisory Agreement will continue in effect for two (2) years initially and thereafter shall continue from year to year provided such continuance is approved at least annually by (a) a vote of the majority of the Independent Trustees, cast in person at a meeting specifically called for the purpose of voting on such approval and by (b) the majority vote of either all of the Trustees or the vote of a majority of the outstanding shares of the Fund. The Advisory Agreement may be terminated without penalty on 60 days' written notice by a vote of a majority of the Trustees or by the Advisor, or by

holders of a majority of that Trust's outstanding shares. The Advisory Agreement shall terminate automatically in the event of its assignment.

Codes of Ethics

The Trust, the Adviser and the Distributor have adopted respective codes of ethics under Rule 17j-1 under the 1940 Act that govern the personal securities transactions of their board members, officers and employees who may have access to current trading information of the Trust. Under these codes of ethics, the Trustees are permitted to invest in securities that may also be purchased by the Fund.

In addition, the Trust has adopted a separate code of ethics that applies only to the Trust's executive officers to ensure that these officers promote professional conduct in the practice of corporate governance and management. The purpose behind these guidelines is to promote i) honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships; ii) full, fair, accurate, timely, and understandable disclosure in reports and documents that a registrant files with, or submits to, the SEC and in other public communications made by the Fund; iii) compliance with applicable governmental laws, rule and regulations; iv) the prompt internal reporting of violations of this Code to an appropriate person or persons identified in the Code; and v) accountability for adherence to the Code.

Proxy Voting Policies

The Board has adopted Proxy Voting Policies and Procedures ("Policies") on behalf of the Trust, which delegate the responsibility for voting proxies of securities held by the Fund to the Adviser and responsibility for voting proxies of securities held by the Fund to the Adviser, subject to the Board's continuing oversight. The Policies require that the Adviser vote proxies received in a manner consistent with the best interests of the Fund and its shareholders. The Policies also require the Adviser to present to the Board, at least annually, the Adviser's Proxy Policies and a record of each proxy voted by the Adviser on behalf of the Fund, including a report on the resolution of all proxies identified by the Adviser as involving a conflict of interest. A copy of the Adviser's Proxy Voting Policies is attached hereto as an Appendix.

More information. Information regarding how the Fund voted proxies relating to portfolio securities held by the Fund during the most recent 12-month period ending June 30 will be available (1) without charge, upon request, by calling the Fund at 1-877-738-9888; and (2) on the U.S. SEC's website at <http://www.sec.gov>. In addition, a copy of the Fund's proxy voting policies and procedures are also available by calling 1-877-738-9888 and will be sent within three business days of receipt of a request.

DISTRIBUTION OF SHARES

Northern Lights Distributors, LLC, located at 4020 South 147th Street, Suite 2, Omaha, Nebraska 68137 (the "Distributor") serves as the principal underwriter and national distributor for the shares of the Fund pursuant to an Underwriting Agreement with the Trust (the "Underwriting Agreement"). The Distributor is registered as a broker-dealer under the Securities Exchange Act of 1934 and each state's securities laws and is a member of FINRA. The offering of the Fund's shares is continuous. The Underwriting Agreement provides that the Distributor, as agent in connection with the distribution of Fund shares, will use its best efforts to distribute the Fund's shares. Michael Miola is an affiliated person of the Trust and the Distributor.

The Underwriting Agreement provides that, unless sooner terminated, it will continue in effect for two years initially and thereafter shall continue from year to year, subject to annual approval by (a) the Board or a vote of a majority of the outstanding shares, and (b) by a majority of the Trustees who are not interested persons of the Trust or of the Distributor by vote cast in person at a meeting called for the purpose of voting on such approval.

The Underwriting Agreement may be terminated by the Fund at any time, without the payment of any penalty, by vote of a majority of the entire Board of the Trust or by vote of a majority of the outstanding shares of the Fund on 60 days' written notice to the Distributor, or by the Distributor at any time, without the payment of any penalty, on 60 days' written notice to the Fund. The Underwriting Agreement will automatically terminate in the event of its assignment.

The Distributor may enter into selling agreements with broker-dealers that solicit orders for the sale of shares of the Fund and may allow concessions to dealers that sell shares of the Fund.

Rule 12b-1 Plan

The Trust has adopted a Distribution Plan and Agreement pursuant to Rule 12b-1 under the 1940 Act for the Fund's Class R shares (the "Class R Plan" or "Plan") pursuant to which R Class of shares of the Fund is authorized to pay fees to the Distributor for providing distribution and/or shareholder services to the Fund. However, because Class R shares are not available for purchase as of the date of this SAI the Plan is dormant. Under the Plan, Class R shares of the Fund may pay an account maintenance fee for account maintenance services and/or distribution fee at an annual rate of up to 0.25% of the average net assets of Class R shares as compensation for the Distributor providing account maintenance and distribution services to shareholders. Such fees are to be paid by the Fund monthly, or at such other intervals, as the Board shall determine. Such fees shall be based upon the Fund's average daily net assets during the preceding month, and shall be calculated and accrued daily. The Fund may pay fees to the Distributor at a lesser rate, as agreed upon by the Board of Trustees of

the Trust and the Distributor. The Plan authorizes payments to the Distributor as compensation for providing account maintenance services to Fund shareholders, including arranging for certain securities dealers or brokers, administrators and others (“Recipients”) to provide these services and paying compensation for these services.

The services to be provided by Recipients may include, but are not limited to, the following: assistance in the offering and sale of Fund shares and in other aspects of the marketing of the shares to clients or prospective clients of the respective recipients; answering routine inquiries concerning the Fund; assisting in the establishment and maintenance of accounts or sub-accounts in the Fund and in processing purchase and redemption transactions; making the Fund’s investment plan and shareholder services available; and providing such other information and services to investors in shares of the Fund as the Distributor or the Trust, on behalf of the Fund, may reasonably request. The distribution services shall also include any advertising and marketing services provided by or arranged by the Distributor with respect to the Fund. The Adviser may be compensated by the Distributor for its distribution and marketing efforts.

The Distributor is required to provide a written report, at least quarterly to the Board of Trustees of the Trust, specifying in reasonable detail the amounts expended pursuant to the Rule 12b-1 Plan and the purposes for which such expenditures were made. Further, the Distributor will inform the Board of any Rule 12b-1 fees to be paid by the Distributor to Recipients.

The initial term of the Rule 12b-1 Plan is one year and will continue in effect from year to year thereafter, provided such continuance is specifically approved at least annually by a majority of the Board of Trustees of the Trust and a majority of the Trustees who are not “interested persons” of the Trust and do not have a direct or indirect financial interest in the Rule 12b-1 Plan (“Rule 12b-1 Trustees”) by votes cast in person at a meeting called for the purpose of voting on the Rule 12b-1 Plan. The Rule 12b-1 Plan may be terminated at any time by the Trust or the Fund by vote of a majority of the Rule 12b-1 Trustees or by vote of a majority of the outstanding voting shares of the Fund.

The Rule 12b-1 Plan may not be amended to increase materially the amount of the Distributor’s compensation to be paid by the Fund, unless such amendment is approved by the vote of a majority of the outstanding voting securities of the affected class of the Fund (as defined in the 1940 Act). All material amendments must be approved by a majority of the Board of Trustees of the Trust and a majority of the Rule 12b-1 Trustees by votes cast in person at a meeting called for the purpose of voting on a Rule 12b-1 Plan. During the term of a Rule 12b-1 Plan, the selection and nomination of non-interested Trustees of the Trust will be committed to the discretion of current non-interested Trustees. The Distributor will preserve copies of the Rule 12b-1 Plan, any related agreements, and all reports, for a period of not less than six years from the date of such document and for at least the first two years in an easily accessible place.

Any agreement related to a Rule 12b-1 Plan will be in writing and provide that:
(a) it may be terminated by the Trust or the applicable Fund at any time upon sixty days’

written notice, without the payment of any penalty, by vote of a majority of the respective Rule 12b-1 Trustees, or by vote of a majority of the outstanding voting securities of the Trust or Fund; (b) it will automatically terminate in the event of its assignment (as defined in the 1940 Act); and (c) it will continue in effect for a period of more than one year from the date of its execution or adoption only so long as such continuance is specifically approved at least annually by a majority of the Board and a majority of the Rule 12b-1 Trustees by votes cast in person at a meeting called for the purpose of voting on such agreement.

PORTFOLIO MANAGER

The following table lists the number and types of accounts managed by the Portfolio Manager in addition to the Fund and assets under management in those accounts as of September, 2009:

Total Other Accounts Managed

Portfolio Manager	Registered Investment Company Accounts	Assets Managed (\$ millions)	Pooled Investment Vehicle Accounts	Assets Managed (\$ millions)	Other Accounts	Assets Managed (\$ millions)
Jeffrey Beamer	None	N/A	1	\$12.5 million	None	N/A

Other Accounts Managed Subject to Performance-Based Fees

Portfolio Manager	Registered Investment Company Accounts	Assets Managed (\$ millions)	Pooled Investment Vehicle Accounts	Assets Managed (\$ millions)	Other Accounts	Assets Managed (\$ millions)
Jeffrey Beamer	None	N/A	1	\$12.5 million	None	N/A

Conflicts of Interest.

As indicated in the table above, the portfolio manager may manage numerous accounts for multiple clients. These accounts may include registered investment companies, other types of pooled accounts (e.g., collective investment funds), and separate accounts (i.e., accounts managed on behalf of individuals or public or private institutions). The portfolio manager makes investment decisions for each account based on the investment objectives and policies and other relevant investment considerations applicable to that portfolio.

When a portfolio manager has responsibility for managing more than one account, potential conflicts of interest may arise. Those conflicts could include preferential treatment of one account over others in terms of allocation of resources or of investment opportunities. For instance, the Adviser may receive fees from certain accounts that are higher than the fee it receives from the Fund, or it may receive a

performance-based fee on certain accounts. In those instances, the portfolio manager may have an incentive to favor the higher and/or performance-based fee accounts over the Fund. The Adviser has adopted policies and procedures designed to address these potential material conflicts. For instance, portfolio managers within the Adviser are normally responsible for all accounts within a certain investment discipline, and do not, absent special circumstances, differentiate among the various accounts when allocating resources. Additionally, the Adviser utilizes a system for allocating investment opportunities among portfolios that is designed to provide a fair and equitable allocation.

The portfolio manager receives a fixed salary and a share of the profits, if any, related to his ownership interest, direct or indirect, if any, in the Adviser.

Ownership.

Since the Fund is newly organized, the portfolio manager does not own shares of the Fund as of the date of this SAI.

ALLOCATION OF PORTFOLIO BROKERAGE

Specific decisions to purchase or sell securities for the Fund are made by the portfolio manager, who is an employee of the Adviser. The Adviser is authorized by the Trustees to allocate the orders placed on behalf of the Fund to brokers or dealers who may, but need not, provide research or statistical material or other services to the Fund or the Adviser for the Fund's use. Such allocation is to be in such amounts and proportions as the Adviser may determine.

In selecting a broker or dealer to execute each particular transaction, the Adviser will take the following into consideration:

- the best net price available;
- the reliability, integrity and financial condition of the broker or dealer;
- the size of and difficulty in executing the order; and
- the value of the expected contribution of the broker or dealer to the investment performance of the Fund on a continuing basis.

Brokers or dealers executing a portfolio transaction on behalf of the Fund may receive a commission in excess of the amount of commission another broker or dealer would have charged for executing the transaction if the Adviser determines in good faith that such commission is reasonable in relation to the value of brokerage, research and other services provided to the Fund. In allocating portfolio brokerage, the Adviser may select brokers or dealers who also provide brokerage, research and other services to other accounts over which the Adviser exercises investment discretion. Some of the services received as the result of Fund transactions may primarily benefit accounts

other than the Fund, while services received as the result of portfolio transactions effected on behalf of those other accounts may primarily benefit the Fund.

PORTFOLIO TURNOVER

The Fund's portfolio turnover rate is calculated by dividing the lesser of purchases or sales of portfolio securities for the fiscal year by the monthly average of the value of the portfolio securities owned by the Fund during the fiscal year. The calculation excludes from both the numerator and the denominator securities with maturities at the time of acquisition of one year or less. High portfolio turnover involves correspondingly greater brokerage commissions and other transaction costs, which will be borne directly by the Fund. A 100% turnover rate would occur if all of the Fund's portfolio securities were replaced once within a one-year period. The Fund's portfolio turnover rate is expected to be below 100% annually.

OTHER SERVICE PROVIDERS

Fund Administration

The Administrator for the Fund is Gemini Fund Services, LLC, ("GFS" or the "Administrator"), which has its principal office at 450 Wireless Blvd., Hauppauge, New York 11788, and is primarily in the business of providing administrative, fund accounting and transfer agent services to retail and institutional mutual funds. GFS is an affiliate of the Distributor.

Pursuant to an Administration Service Agreement with the Fund, the Administrator provides administrative services to the Fund, subject to the supervision of the Board. The Administrator may provide persons to serve as officers of the Fund. Such officers may be directors, officers or employees of the Administrator or its affiliates.

The Administration Service Agreement was initially approved by the Board at a meeting held on August 5, 2009. The Agreement shall remain in effect for three years from the date of its initial approval, and subject to annual approval of the Board for one-year periods thereafter. The Administration Service Agreement is terminable by the Board or the Administrator on ninety days' written notice and may be assigned provided the non-assigning party provides prior written consent. This Agreement provides that in the absence of willful misfeasance, bad faith or gross negligence on the part of the Administrator or reckless disregard of its obligations thereunder, the Administrator shall not be liable for any action or failure to act in accordance with its duties thereunder.

Under the Administration Service Agreement, the Administrator provides facilitating administrative services, including: (i) providing services of persons competent to perform such administrative and clerical functions as are necessary to provide effective administration of the Fund; (ii) facilitating the performance of administrative and professional services to the Fund by others, including the Fund's Custodian; (iii) preparing, but not paying for, the periodic updating of the Fund's Registration Statement, Prospectuses and Statement of Additional Information in conjunction with Fund counsel, including the printing of such documents for the purpose of filings with the SEC and state securities administrators, and preparing reports to the Fund's shareholders and the SEC; (iv) preparing in conjunction with Fund counsel, but not paying for, all filings under the securities or "Blue Sky" laws of such states or countries as are designated by the Distributor, which may be required to register or qualify, or continue the registration or qualification, of the Fund and/or its shares under such laws; (v) preparing notices and agendas for meetings of the Board and minutes of such meetings in all matters required by the 1940 Act to be acted upon by the Board; and (vi) monitoring daily and periodic compliance with respect to all requirements and restrictions of the 1940 Act, the Internal Revenue Code and the Prospectus.

For the services rendered to the Fund, during its first year of operations, by the Administrator, the Fund pays the Administrator a fund administration fee equal to the greater of \$40,000 minimum or 0.10% on the first \$100 million of net assets, 0.08% on the next \$150 million of net assets and 0.06% on net assets greater than \$250 million. The Fund also pays the Administrator for any out-of-pocket expenses.

Fund Accounting

The Administrator, pursuant to the Fund Accounting Service Agreement, provides the Fund with accounting services, including: (i) daily computation of net asset value; (ii) maintenance of security ledgers and books and records as required by the 1940 Act; (iii) production of the Fund's listing of portfolio securities and general ledger reports; (iv) reconciliation of accounting records; (v) calculation of yield and total return for the Fund; (vi) maintaining certain books and records described in Rule 31a-1 under the 1940 Act, and reconciling account information and balances among the Fund's custodian or Adviser; and (vii) monitoring and evaluating daily income and expense accruals, and sales and redemptions of shares of the Fund.

For the services rendered to the Fund by the Fund Accounting Service Agreement, the Fund pays the Fund Accountant, during its first year of operations, an annual fee of \$28,000 per fund portfolio, plus, after the first year, \$6,000 for each additional share class above one, plus, \$6,000 for bond fund charges, plus; 0.02% on net assets of \$25 million to \$100 million and 0.01% on net assets greater than \$100 million. Discounts are based on service fee minimums only. The Fund also pays the Administrator for any out-of-pocket expenses.

Transfer Agent

GFS, 4020 South 147th Street, Suite 2, Omaha, NE 68137, acts as transfer, dividend disbursing, and shareholder servicing agent for the Fund pursuant to a written agreement with the Fund. Under the agreement, GFS is responsible for administering and performing transfer agent functions, dividend distribution, shareholder administration, and maintaining necessary records in accordance with applicable rules and regulations. For the services rendered to the Fund, during its first year of operations, the Fund pays the Transfer Agent an annual fee equal to the greater of \$18,000 per share class or \$16.00 per account per share class. The Fund also pays the Transfer Agent for any out-of-pocket expenses.

Custodian

Union Bank of California, National Association, (the "Custodian") serves as the custodian of the Fund's assets pursuant to a Custody Agreement by and between the Custodian and the Trust on behalf of the Fund. The Custodian's responsibilities include safeguarding and controlling the Fund's cash and securities, handling the receipt and delivery of securities, and collecting interest and dividends on the Fund's investments. Pursuant to the Custody Agreement, the Custodian also maintains original entry documents and books of record and general ledgers; posts cash receipts and disbursements; and records purchases and sales based upon communications from the Adviser. The Fund may employ foreign sub-custodians that are approved by the Board to hold foreign assets. The Custodian's principal place of business is 350 California Street, 6th Floor, San Francisco, California 94104.

Compliance Services

Northern Lights Compliance Services, LLC ("NLCS"), an affiliate of GFS and the Distributor, provides a Chief Compliance Officer to the Trust as well as related compliance services pursuant to a consulting agreement between NLCS and the Trust. The Fund pays a compliance service fee to NLCS.

DESCRIPTION OF SHARES

Each share of beneficial interest of the Trust has one vote in the election of Trustees. Cumulative voting is not authorized for the Trust. This means that the holders of more than 50% of the shares voting for the election of Trustees can elect 100% of the Trustees if they choose to do so, and, in that event, the holders of the remaining shares will be unable to elect any Trustees.

Shareholders of the Trust and any other future series of the Trust will vote in the aggregate and not by series except as otherwise required by law or when the Board determines that the matter to be voted upon affects only the interest of the shareholders of a particular series. Matters such as ratification of the independent public accountants

and election of Trustees are not subject to separate voting requirements and may be acted upon by shareholders of the Trust voting without regard to series.

The Trust is authorized to issue an unlimited number of shares of beneficial interest. Each share has equal dividend, distribution and liquidation rights. There are no conversion or preemptive rights applicable to any shares of the Fund. All shares issued are fully paid and non-assessable.

ANTI-MONEY LAUNDERING PROGRAM

The Trust has established an Anti-Money Laundering Compliance Program (the "Program") as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA Patriot Act"). To ensure compliance with this law, the Trust's Program provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program. The Trust's secretary serves as its Anti-Money Laundering Compliance Officer.

Procedures to implement the Program include, but are not limited to, determining that the Fund's Distributor, and Transfer Agent have established proper anti-money laundering procedures, reported suspicious and/or fraudulent activity and a complete and thorough review of all new opening account applications. The Trust will not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA Patriot Act.

As a result of the Program, the Trust may be required to "freeze" the account of a shareholder if the shareholder appears to be involved in suspicious activity or if certain account information matches information on government lists of known terrorists or other suspicious persons, or the Trust may be required to transfer the account or proceeds of the account to a governmental agency.

PURCHASE, REDEMPTION AND PRICING OF SHARES

Calculation of Share Price

As indicated in the Prospectus under the heading "Net Asset Value," the net asset value ("NAV") of the Fund's shares, by class, is determined by dividing the total value of the Fund's portfolio investments and other assets, less any liabilities, by the total number of shares outstanding of the Fund, by class.

For purposes of calculating the NAV, portfolio securities and other assets for which market quotes are available are stated at market value. Market value is generally determined on the basis of last reported sales prices, or if no sales are reported, based on quotes obtained from a quotation reporting system, established market makers, or pricing services. Securities primarily traded in the NASDAQ National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price ("NOCP"). If the NOCP is not available, such securities shall be valued at the last sale price on the day of valuation, or if there has been no sale on such day, at the last bid on the primary exchange. Certain securities or investments for which daily market quotes are not readily available may be valued, pursuant to guidelines established by the Board, with reference to other securities or indices. Short-term investments having a maturity of 60 days or less are generally valued at amortized cost. Exchange traded options; futures and options on futures are valued at the settlement price determined by the exchange. Other securities for which market quotes are not readily available are valued at fair value as determined in good faith by the Board or persons acting at their direction.

Investments initially valued in currencies other than the U.S. dollar are converted to U.S. dollars using exchange rates obtained from pricing services. As a result, the NAV of the Fund's shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of securities traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the New York Stock Exchange is closed and an investor is not able to purchase, redeem or exchange shares.

Fund shares are valued at the close of regular trading on the New York Stock Exchange (normally 4:00 p.m., Eastern time) (the "NYSE Close") on each day that the New York Stock Exchange is open. For purposes of calculating the NAV, the Fund normally use pricing data for domestic equity securities received shortly after the NYSE Close and does not normally take into account trading, clearances or settlements that take place after the NYSE Close. Domestic fixed income and foreign securities are normally priced using data reflecting the earlier closing of the principal markets for those securities. Information that becomes known to the Fund or its agents after the NAV has been calculated on a particular day will not generally be used to retroactively adjust the price of the security or the NAV determined earlier that day.

In unusual circumstances, instead of valuing securities in the usual manner, the Fund may value securities at fair value or estimate their value as determined in good faith by the Board or its designees, pursuant to procedures approved by the Board. Fair valuation may also be used by the Board if extraordinary events occur after the close of the relevant market but prior to the NYSE Close.

The Trust expects that the holidays upon which the Exchange will be closed are as follows: New Year's Day, Martin Luther King, Jr. Day, President's Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

Purchase of Shares

Orders for shares received by the Fund in good order prior to the close of business on the NYSE on each day during such periods that the NYSE is open for trading are priced at NAV per share computed as of the close of the regular session of trading on the NYSE. Orders received in good order after the close of the NYSE, or on a day it is not open for trading, are priced at the close of such NYSE on the next day on which it is open for trading at the next determined NAV or offering price per share.

Redemption of Shares

The Fund will redeem all or any portion of a shareholder's shares in the Fund when requested in accordance with the procedures set forth in the "Redemptions" section of the Prospectus. Under the 1940 Act, a shareholder's right to redeem shares and to receive payment therefore may be suspended at times:

- (a) when the NYSE is closed, other than customary weekend and holiday closings;
- (b) when trading on that exchange is restricted for any reason;
- (c) when an emergency exists as a result of which disposal by the Fund of securities owned by it is not reasonably practicable or it is not reasonably practicable for the Fund to fairly determine the value of its net assets, provided that applicable rules and regulations of the SEC (or any succeeding governmental authority) will govern as to whether the conditions prescribed in (b) or (c) exist; or
- (d) when the SEC by order permits a suspension of the right to redemption or a postponement of the date of payment on redemption.

In case of suspension of the right of redemption, payment of a redemption request will be made based on the NAV next determined after the termination of the suspension.

The Fund may purchase shares of Underlying Funds which charge a redemption fee to shareholders (such as the Fund) that redeem shares of the Underlying Fund within a certain period of time (such as one year). The fee is payable to the Underlying Fund. Accordingly, if the Fund were to invest in an Underlying Fund and incur a redemption fee as a result of redeeming shares in such Underlying Fund, the Fund would bear such redemption fee. The Fund will not, however, invest in shares of an Underlying Fund that is sold with a contingent deferred sales load.

Supporting documents in addition to those listed under "Redemptions" in the Prospectus will be required from executors, administrators, Trustees, or if redemption is requested by someone other than the shareholder of record. Such documents include, but are not restricted to, stock powers, Trust instruments, certificates of death, appointments as executor, certificates of corporate authority and waiver of tax required in some states when settling estates.

Redemption Fee

The Fund will deduct a 2.00% redemption fee on your redemption amount, if you sell your shares after holding them less than 30 days from purchase. Redemption amount is NAV less any other redemption-related fees, if any, such as contingent deferred sales charges or fees on shares purchased load-waived but held less than the minimum required time period. Shares held longest will be treated as being redeemed first and shares held shortest as being redeemed last. Shares held for 30 days or more are not subject to the 2.00% fee. Redemption fees are paid to the Fund directly and are designed to offset costs associated with fluctuations in Fund asset levels and cash flow caused by short-term shareholder trading.

Waivers of Redemption Fees: The Fund has elected not to impose the redemption fee for:

- redemptions and exchanges of Fund shares acquired through the reinvestment of dividends and distributions;
- certain types of redemptions and exchanges of Fund shares owned through participant-directed retirement plans;
- redemptions or exchanges in discretionary asset allocation, fee based or wrap programs (“wrap programs”) that are initiated by the sponsor/financial advisor as part of a periodic rebalancing;
- redemptions or exchanges in a fee based or wrap program that are made as a result of a full withdrawal from the wrap program or as part of a systematic withdrawal plan including the Fund's systematic withdrawal plan;
- involuntary redemptions, such as those resulting from a shareholder's failure to maintain a minimum investment in the Fund, or to pay shareholder fees; or
- other types of redemptions as the Advisor or the Trust may determine in special situations and approved by the Fund's or the Adviser's Chief Compliance Officer.

TAX STATUS

The following discussion is general in nature and should not be regarded as an exhaustive presentation of all possible tax ramifications. All shareholders should consult a qualified tax advisor regarding their investment in the Fund.

The Fund intends to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the “Code”), which requires compliance with certain requirements concerning the sources of its income, diversification of its assets, and the amount and timing of its distributions to shareholders. Such qualification does not involve supervision of management or investment practices or policies by any government agency or bureau. By so qualifying, the Fund should not be subject to federal income or excise tax on its net investment income or net capital gain, which are distributed to shareholders in accordance with the

applicable timing requirements. Net investment income and net capital gain of the Fund will be computed in accordance with Section 852 of the Code.

Net investment income is made up of dividends and interest less expenses. Net capital gain for a fiscal year is computed by taking into account any capital loss carryforward of the Fund.

The Fund intends to distribute all of its net investment income, any excess of net short-term capital gains over net long-term capital losses, and any excess of net long-term capital gains over net short-term capital losses in accordance with the timing requirements imposed by the Code and therefore should not be required to pay any federal income or excise taxes. Distributions of net investment income and net capital gain will be made after the end of each fiscal year, and no later than December 31 of each year. Both types of distributions will be in shares of the Fund unless a shareholder elects to receive cash.

To be treated as a regulated investment company under Subchapter M of the Code, the Fund must also (a) derive at least 90% of its gross income from dividends, interest, payments with respect to securities loans, net income from certain publicly traded partnerships and gains from the sale or other disposition of securities or foreign currencies, or other income (including, but not limited to, gains from options, futures or forward contracts) derived with respect to the business of investing in such securities or currencies, and (b) diversify its holding so that, at the end of each fiscal quarter, (i) at least 50% of the market value of the Fund's assets is represented by cash, U.S. government securities and securities of other regulated investment companies, and other securities (for purposes of this calculation, generally limited in respect of any one issuer, to an amount not greater than 5% of the market value of the Fund's assets and 10% of the outstanding voting securities of such issuer) and (ii) not more than 25% of the value of its assets is invested in the securities of (other than U.S. government securities or the securities of other regulated investment companies) any one issuer, two or more issuers which the Fund controls and which are determined to be engaged in the same or similar trades or businesses, or the securities of certain publicly traded partnerships.

If the Fund fails to qualify as a regulated investment company under Subchapter M in any fiscal year, it will be treated as a corporation for federal income tax purposes. As such the Fund would be required to pay income taxes on its net investment income and net realized capital gains, if any, at the rates generally applicable to corporations. Shareholders of the Fund generally would not be liable for income tax on the Fund's net investment income or net realized capital gains in their individual capacities. Distributions to shareholders, whether from the Fund's net investment income or net realized capital gains, would be treated as taxable dividends to the extent of current or accumulated earnings and profits of the Fund.

The Fund is subject to a 4% nondeductible excise tax on certain undistributed amounts of ordinary income and capital gain under a prescribed formula contained in

Section 4982 of the Code. The formula requires payment to shareholders during a calendar year of distributions representing at least 98% of the Fund's ordinary income for the calendar year and at least 98% of its capital gain net income (i.e., the excess of its capital gains over capital losses) realized during the one-year period ending October 31 during such year plus 100% of any income that was neither distributed nor taxed to the Fund during the preceding calendar year. Under ordinary circumstances, the Fund expects to time its distributions so as to avoid liability for this tax.

The following discussion of tax consequences is for the general information of shareholders that are subject to tax. Shareholders that are IRAs or other qualified retirement plans are exempt from income taxation under the Code.

Distributions of taxable net investment income and the excess of net short-term capital gain over net long-term capital loss are taxable to shareholders as ordinary income. In most cases the Fund will hold shares in Underlying Funds for less than 12 months, such that its sales of such shares from time to time will not qualify as long-term capital gains for those investors who hold shares of the Fund in taxable accounts.

Distributions of net capital gain ("capital gain dividends") generally are taxable to shareholders as short-term capital gain; regardless of the length of time the shares of the Trust have been held by such shareholders.

Redemption of Fund shares by a shareholder will result in the recognition of taxable gain or loss in an amount equal to the difference between the amount realized and the shareholder's tax basis in his or her Fund shares. Such gain or loss is treated as a capital gain or loss if the shares are held as capital assets. However, any loss realized upon the redemption of shares within six months from the date of their purchase will be treated as a long-term capital loss to the extent of any amounts treated as capital gain dividends during such six-month period. All or a portion of any loss realized upon the redemption of shares may be disallowed to the extent shares are purchased (including shares acquired by means of reinvested dividends) within 30 days before or after such redemption.

Distributions of taxable net investment income and net capital gain will be taxable as described above, whether received in additional cash or shares. Shareholders electing to reinvest distributions in the form of additional shares will have a cost basis for federal income tax purposes in each share so received equal to the net asset value of a share on the reinvestment date.

All distributions of taxable net investment income and net capital gain, whether received in shares or in cash, must be reported by each taxable shareholder on his or her federal income tax return. Dividends or distributions declared in October, November or December as of a record date in such a month, if any, will be deemed to have been received by shareholders on December 31, if paid during January of the following year. Redemptions of shares may result in tax consequences (gain or loss) to the shareholder and are also subject to these reporting requirements.

Under the Code, the Fund will be required to report to the Internal Revenue Service all distributions of taxable income and capital gains as well as gross proceeds from the redemption or exchange of Fund shares, except in the case of certain exempt shareholders. Under the backup withholding provisions of Section 3406 of the Code, distributions of taxable net investment income and net capital gain and proceeds from the redemption or exchange of the shares of a regulated investment company may be subject to withholding of federal income tax in the case of non-exempt shareholders who fail to furnish the investment company with their taxpayer identification numbers and with required certifications regarding their status under the federal income tax law, or if the Fund is notified by the IRS or a broker that withholding is required due to an incorrect TIN or a previous failure to report taxable interest or dividends. If the withholding provisions are applicable, any such distributions and proceeds, whether taken in cash or reinvested in additional shares, will be reduced by the amounts required to be withheld.

Options, Futures, Forward Contracts and Swap Agreements

To the extent such investments are permissible for the Fund, the Fund's transactions in options, futures contracts, hedging transactions, forward contracts, straddles and foreign currencies will be subject to special tax rules (including mark-to-market, constructive sale, straddle, wash sale and short sale rules), the effect of which may be to accelerate income to the Fund, defer losses to the Fund, cause adjustments in the holding periods of the Fund's securities, convert long-term capital gains into short-term capital gains and convert short-term capital losses into long-term capital losses. These rules could therefore affect the amount, timing and character of distributions to shareholders.

To the extent such investments are permissible, certain of the Fund's hedging activities (including its transactions, if any, in foreign currencies or foreign currency-denominated instruments) are likely to produce a difference between its book income and its taxable income. If the Fund's book income exceeds its taxable income, the distribution (if any) of such excess book income will be treated as (i) a dividend to the extent of the Fund's remaining earnings and profits (including earnings and profits arising from tax-exempt income), (ii) thereafter, as a return of capital to the extent of the recipient's basis in the shares, and (iii) thereafter, as gain from the sale or exchange of a capital asset. If the Fund's book income is less than taxable income, the Fund could be required to make distributions exceeding book income to qualify as a regulated investment company that is accorded special tax treatment.

Passive Foreign Investment Companies

Investment by the Fund in certain "passive foreign investment companies" ("PFICs") could subject the Fund to a U.S. federal income tax (including interest charges) on distributions received from the company or on proceeds received from the disposition of shares in the company, which tax cannot be eliminated by making

distributions to Fund shareholders. However, the Fund may elect to treat a PFIC as a "qualified electing fund" ("QEF"), in which case the Fund will be required to include its share of the company's income and net capital gains annually, regardless of whether it receives any distribution from the company.

The Fund also may make an election to mark the gains (and to a limited extent losses) in such holdings "to the market" as though it had sold and repurchased its holdings in those PFICs on the last day of the Fund's taxable year. Such gains and losses are treated as ordinary income and loss. The QEF and mark-to-market elections may accelerate the recognition of income (without the receipt of cash) and increase the amount required to be distributed for the Fund to avoid taxation. Making either of these elections therefore may require the Fund to liquidate other investments (including when it is not advantageous to do so) to meet its distribution requirement, which also may accelerate the recognition of gain and affect the Fund's total return.

Foreign Currency Transactions

The Fund's transactions in foreign currencies, foreign currency-denominated debt securities and certain foreign currency options, futures contracts and forward contracts (and similar instruments) may give rise to ordinary income or loss to the extent such income or loss results from fluctuations in the value of the foreign currency concerned.

Foreign Taxation

Income received by the Fund from sources within foreign countries may be subject to withholding and other taxes imposed by such countries. Tax treaties and conventions between certain countries and the U.S. may reduce or eliminate such taxes. If more than 50% of the value of the Fund's total assets at the close of its taxable year consists of securities of foreign corporations, the Fund may be able to elect to "pass through" to its shareholders the amount of eligible foreign income and similar taxes paid by the Fund. If this election is made, a shareholder generally subject to tax will be required to include in gross income (in addition to taxable dividends actually received) his or her pro rata share of the foreign taxes paid by the Fund, and may be entitled either to deduct (as an itemized deduction) his or her pro rata share of foreign taxes in computing his or her taxable income or to use it as a foreign tax credit against his or her U.S. federal income tax liability, subject to certain limitations. In particular, a shareholder must hold his or her shares (without protection from risk of loss) on the ex-dividend date and for at least 15 more days during the 30-day period surrounding the ex-dividend date to be eligible to claim a foreign tax credit with respect to a gain dividend. No deduction for foreign taxes may be claimed by a shareholder who does not itemize deductions. Each shareholder will be notified within 60 days after the close of the Fund's taxable year whether the foreign taxes paid by the Fund will "pass through" for that year.

Generally, a credit for foreign taxes is subject to the limitation that it may not exceed the shareholder's U.S. tax attributable to his or her total foreign source taxable

income. For this purpose, if the pass-through election is made, the source of the Fund's income will flow through to shareholders of the Fund. With respect to the Fund, gains from the sale of securities will be treated as derived from U.S. sources and certain currency fluctuation gains, including fluctuation gains from foreign currency-denominated debt securities, receivables and payables will be treated as ordinary income derived from U.S. sources. The limitation on the foreign tax credit is applied separately to foreign source passive income, and to certain other types of income. A shareholder may be unable to claim a credit for the full amount of his or her proportionate share of the foreign taxes paid by the Fund. The foreign tax credit can be used to offset only 90% of the revised alternative minimum tax imposed on corporations and individuals and foreign taxes generally are not deductible in computing alternative minimum taxable income.

Original Issue Discount and Pay-In-Kind Securities

Current federal tax law requires the holder of a U.S. Treasury or other fixed income zero coupon security to accrue as income each year a portion of the discount at which the security was purchased, even though the holder receives no interest payment in cash on the security during the year. In addition, pay-in-kind securities will give rise to income, which is required to be distributed and is taxable even though the Fund holding the security receives no interest payment in cash on the security during the year.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by the Fund may be treated as debt securities that are issued originally at a discount. Generally, the amount of the original issue discount ("OID") is treated as interest income and is included in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. A portion of the OID includable in income with respect to certain high-yield corporate debt securities (including certain pay-in-kind securities) may be treated as a dividend for U.S. federal income tax purposes.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by the Fund in the secondary market may be treated as having market discount. Generally, any gain recognized on the disposition of, and any partial payment of principal on, a debt security having market discount is treated as ordinary income to the extent the gain, or principal payment, does not exceed the "accrued market discount" on such debt security. Market discount generally accrues in equal daily installments. The Fund may make one or more of the elections applicable to debt securities having market discount, which could affect the character and timing of recognition of income.

Some debt securities (with a fixed maturity date of one year or less from the date of issuance) that may be acquired by the Fund may be treated as having acquisition discount, or OID in the case of certain types of debt securities. Generally, the Fund will be required to include the acquisition discount, or OID, in income over the term of the

debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. The Fund may make one or more of the elections applicable to debt securities having acquisition discount, or OID, which could affect the character and timing of recognition of income.

If the Fund holds the foregoing kinds of securities, it may be required to pay out as an income distribution each year an amount that is greater than the total amount of cash interest the Fund actually received. Such distributions may be made from the cash assets of the Fund or by liquidation of portfolio securities, if necessary (including when it is not advantageous to do so). The Fund may realize gains or losses from such liquidations. In the event the Fund realizes net capital gains from such transactions, its shareholders may receive a larger capital gain distribution, if any, than they would in the absence of such transactions.

Shareholders of the Fund may be subject to state and local taxes on distributions received from the Fund and on redemptions of the Fund's shares.

A brief explanation of the form and character of the distribution accompany each distribution. In January of each year the Fund issues to each shareholder a statement of the federal income tax status of all distributions.

Shareholders should consult their tax advisors about the application of federal, state and local and foreign tax law in light of their particular situation.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Briggs, Bunting & Dougherty, LLP, located at 1835 Market Street, 26th Floor, Philadelphia, Pennsylvania 19103, serves as the Fund's independent registered public accounting firm providing services including (1) audit of annual financial statements, and (2) assistance and consultation in connection with SEC filings.

LEGAL COUNSEL

Thompson Hine LLP, 312 Walnut Street, 14th floor Cincinnati, Ohio 45202-4089 serves as the Trust's legal counsel.

APPENDIX
PROXY VOTING GUIDELINES FOR
Lacerte Capital Advisers, LLC

FUND POLICIES

It is the policy of LCA to participate in class action lawsuits and to vote all proxies in respect of securities held by the Fund ("Client Securities") in a manner consistent with best interests of the Fund.

The CCO is responsible for ensuring adherence to the Company's Proxy Voting Policy as follows (the "Policy").

General Intent

The Company generally will monitor proposed corporate actions and proxy matters in respect of Client Securities, and may take any of the following actions based on the best interests of the Fund: (i) determine how to vote the proxies, (ii) abstain, or (iii) follow the recommendations of an independent proxy voting service in voting the proxies.

In general, the Company will determine how to vote proxies based on our reasonable judgment of that vote most likely to produce favorable financial results for the Fund. Proxy votes generally will be cast in favor of proposals that maintain or strengthen the shared interests of shareholders and management, increase shareholder value, maintain or increase shareholder influence over the issuer's board of directors and management, and maintain or increase the rights of shareholders; proxy votes generally will be cast against proposals having the opposite effect. However, the Company will consider both

sides of each proxy issue. Consistent with the Company's paramount commitment to the financial investment goals of the Fund, social considerations will not be considered absent contrary instructions by a client.

Proposals Specific to Mutual Funds

LCA serves as investment adviser to certain investment companies under the Northern Lights Fund Trust. These funds invest in other investment companies that are not affiliated ("Underlying Funds") and are required by the Investment Company Act of 1940, as amended (the "1940 Act") Act to handle proxies received from Underlying Funds in a certain manner. Notwithstanding the guidelines provided in these procedures, it is the policy of LCA to vote all proxies received from the Underlying Funds in the same proportion that all shares of the Underlying Funds are voted, or in accordance with instructions received from fund shareholders, pursuant to Section 12(d)(1)(F) of the 1940 Act. After properly voted, the proxy materials are placed in a file maintained by the Chief Compliance Officer for future reference.

Conflicts of Interest

Conflicts of interest between the Company or a principal of the Company in respect of a proxy issue conceivably may arise, for example, from personal or professional relationships with a company or with the directors, candidates for director, or senior executives of a company that is the issuer of Client Securities.

If the Compliance Officer determines that a material conflict of interest exists, the following procedures shall be followed:

- The Company may abstain from voting, particularly if there are conflicting client interests (for example, where client accounts hold different Client Securities in a competitive merger situation); or
- The Company may follow the recommendations of an independent proxy voting service in voting the proxies.

Recordkeeping Requirements

The Company shall maintain the following records relating to this Policy:

1. A copy of the Policy as it may be amended from time to time.
2. A copy of each proxy statement received by the Company in respect of Client Securities. This requirement may be satisfied by relying on a third party to make and retain, on the Company's behalf, a copy of a proxy statement (provided that the Company has obtained an undertaking from the third party to provide a copy of the proxy statement promptly upon request), or the Company may rely on obtaining a copy of a proxy statement from the SEC's EDGAR system.
3. A record of each vote cast by the Company on behalf of the Fund. This requirement may be satisfied by relying on a third party to make and retain, on the Company's behalf, a record of the vote cast (if the Company has obtained an undertaking from the third party to provide a copy of the record promptly upon request).
4. A copy of any document created by the Company that was material to making a decision about how to vote proxies or that memorializes the basis for that decision.
5. A copy of each written investor request for information about how the Company voted proxies on behalf of the Fund, and a copy of any written response by the Company to any such (written or oral) investor request.

All of the foregoing records shall be maintained and preserved in an easily accessible place for a period of not less than five years from the end of the fiscal year during which the last entry was made on such record, the first two years in the offices of the Company.

SEPARATELY MANAGED ACCOUNTS

Proxy Voting

Without exception, LCA does not vote proxies on behalf of clients. All proxy materials received on behalf of a client account are to be sent directly to our client or a designated representative of the client, who is responsible for voting the proxy. LCA personnel may answer client questions regarding proxy-voting matters in an effort to assist the client in determining how to vote the proxy. However, the final decision of how to vote the proxy rests with the client.

Class Action Lawsuits

From time to time, securities held in the accounts of clients will be the subject of class action lawsuits. The Company has no obligation to determine if securities held by the client are subject to a pending or resolved class action lawsuit. It also has no duty to evaluate a client's eligibility or to submit a claim to participate in the proceeds of a securities class action settlement or verdict. Furthermore, the Company has no obligation or responsibility to initiate litigation to recover damages on behalf of clients who may have been injured because of actions, misconduct, or negligence by corporate management of issuers whose securities are held by clients.

Where the Company receives written or electronic notice of a class action lawsuit, settlement, or verdict affecting securities owned by a client, it will forward all notices, proof of claim forms, and other materials, to the client. Electronic mail is acceptable where appropriate, if the client has authorized contact in this manner.
